*Computers and Society* Ronald M. Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies and most aspects of modern life have changed significantly with their widespread availability and use. Technology at various scales: supercomputers, corporate networks, desktop and laptop computers, the internet, tablets, mobile phones, and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye all pervade our world in a major way. *Computers and Society: Modern Perspectives* is a wide-ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media, education, and learning; medicine and health; free speech, democracy, and government; and war and peace. Ronald M. Baecker reviews critical ethical issues raised by computers such as digital inclusion, security, safety, privacy, automation, and work, and discusses social, political, and ethical controversies and choices now faced by society. Particular attention is paid to new and exciting developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI.

*Avatars, Activism and Postdigital Performance* Liam Jarvis, Karen Savage, 2021-11-18 In the context of the postdigital age where technology is increasingly part of our social and political world, *Avatars, Activism and Postdigital Performance* traces how identity can be created, developed, hijacked, manipulated, sabotaged, and explored through performance in postdigital cultures. Considering how technology is reshaping performance, this timely collection reveals how we engage in performance practices through expanded notions of intermediality, knotted networks, and layering. This book examines the artist as activist and producer of avatars and how digital doubles, artificial intelligence, and semi-automated politics are problematizing and expanding our discussions of identity. Using a range of examples in theatre, film, and internet-based performance practices, chapters examine the uncertain boundaries of networked informational selves in mediatized cultures, the impacts of machine algorithms, apps, and the consequences of digital legacies. Case studies include James Cameron's *Avatar*, Blast Theory's *Karen*, Ontroerend Goed's *A Game of You*, Randy Rainbow's online videos, Sisters Grimm's *Calpurnia*, Descending Dead Centre's *Lippy*, and Chekhov's *First Play*, and Jo Scott's practice as research in place mixing. This is an incisive study for scholars, students, and practitioners interested in the wider conversations around identity formation in postdigital cultures.
