Management Research for the Common Good Robert H. Tiell,S. Charles Malka,2024-03-01 How can management research promote a more applicable and a more transparent knowledge for the benefit of individuals and organizations Looming large over this question is the challenge of repurposing management research for improving public good Co edited by R H Tiell and S C Malka the title of the book says it all Amplifying management research for the common good Lessons for curious individuals and organizations Insights from practitioners in the field In this book we sought to bridge the chasm that separates the non academic audience from the typically less accessible scientific journals We attempted to make empirical evidence more inclusive impactful and public good relevant for the non academic stakeholders that live and work in the broader community For that purpose we made available to the reader and to our chapter contributors a collection of published papers some authored by the editors of this book and others co authored with other researchers The papers cover a diverse set of business topics all of which we believe hold much relevance for management today Providing the reader with their insights on subject matter along with lessons and practical recommendations we sought experts in the field that can build on empirical research in various areas of management and then synthesize and broaden it through their expertise and work experience As a trigger we aligned each contributor with one or two empirical papers based on their background interests and professional experience Using the assigned papers as a springboard we asked each author to identify emerging

themes around which they can build their chapter We wanted them to think of the book audience non academicians comprised of interested and curious individuals managers and their organizations And we wanted our authors to elaborate on practical lessons suggestions and recommendations that can make a difference in the lives of the book audience Our effort resulted in a collection of chapters covering a wide range of topics from supply chain challenges in Central America to life changing long term effects of the pandemic from delivery of services for mental health and suicide to logistics capabilities pre post Ivan in the Cayman Islands from the new workplace to labor market shortages and from new workforce service pathways and the optimization of talent to the impact of recent recessions on the youth and the unemployed and the assessment of C suit level leaders We would like to believe that the breadth of the topics covered and the amount of information being disseminated through the book chapters are meaningful practical and relevant to a wide audience of curious readers
