The object of chess is to place the opponent's king piece in 'check'. This is when the piece is in direct threat of being taken by the opponent. Check can be interrupted by blocking the attack with another piece, or by moving the king piece to safety. When no moves can be made to protect the king, it is in 'checkmate' and the game is over.

The pieces in chess each have their own individual moves.

**PAWN** - Can only move one square forward per turn, except for their first when they can move two. They can capture other pieces diagonally to their front left and right.

**ROOK** - Can move any number of squares horizontally or vertically. It cannot jump over other pieces.

**KNIGHT** - Moves in an 'L' shape two squares horizontally, and then one square left or right. It is the only piece with the ability to jump over others.

**BISHOP** - Can move any number of squares diagonally. It cannot jump over other pieces.

**KING** - Can move one square in any direction.

**QUEEN** - Can move any number of squares horizontally, vertically or diagonally. It cannot jump over other pieces.

In an age when men are practicing yoga and getting manicures but are still expected to open jars and change flat tires it's no wonder you may feel like you've lost your bearings. A surefire way to impress your boss? But never fear while you're learning to order sushi, avoid jet lag, and write thank you notes, you'll still spend the bulk of your time beefing up on such traditional manly skills as swinging a hammer and building a shelter in the wild. So come on, fellas, it's time to tie your own ties, ask for a raise, get the best table in the restaurant, shave without nicking yourself, and train your dog better than your last girlfriend trained you.
