**Limits, Series, and Fractional Part Integrals** Ovidiu Furdui, 2013-05-30 This book features challenging problems of classical analysis that invite the reader to explore a host of strategies and tools used for solving problems of modern topics in real analysis This volume offers an unusual collection of problems many of them original specializing in three topics of mathematical analysis limits series and fractional part integrals The work is divided into three parts each containing a chapter dealing with a particular problem type as well as a very short section of hints to select problems The first chapter collects problems on limits of special sequences and Riemann integrals the second chapter focuses on the calculation of fractional part integrals with a special section called Quickies which contains problems that have had unexpected succinct solutions The final chapter offers the reader an assortment of problems with a flavor towards the computational aspects of infinite series and special products many of which are new to the literature Each chapter contains a section of difficult problems which are motivated by other problems in the book These Open Problems may be considered research projects for students who are studying advanced calculus and which are intended to stimulate creativity and the discovery of new and original methods for proving known results and establishing new ones This stimulating collection of problems is intended for undergraduate students with a strong background in analysis graduate students in

mathematics physics and engineering researchers and anyone who works on topics at the crossroad between pure and applied mathematics Moreover the level of problems is appropriate for students involved in the Putnam competition and other high level mathematical contests

**Fractional-in-Time Semilinear Parabolic Equations and Applications**

Ciprian G. Gal, Mahamadi Warma, 2020-09-23 This book provides a unified analysis and scheme for the existence and uniqueness of strong and mild solutions to certain fractional kinetic equations This class of equations is characterized by the presence of a nonlinear time dependent source generally of arbitrary growth in the unknown function a time derivative in the sense of Caputo and the presence of a large class of diffusion operators The global regularity problem is then treated separately and the analysis is extended to some systems of fractional kinetic equations including prey predator models of Volterra Lotka type and chemical reactions models all of them possibly containing some fractional kinetics Besides classical examples involving the Laplace operator subject to standard namely Dirichlet Neumann Robin dynamic Wentzell and Steklov boundary conditions the framework also includes non standard diffusion operators of fractional type subject to appropriate boundary conditions This book is aimed at graduate students and researchers in mathematics physics mathematical engineering and mathematical biology whose research involves partial differential equations

**Calculus I with**

**Integrated Precalculus** Laura Taalman, 2013-01-14 Taalman's Calculus I with Integrated Precalculus helps students with weak mathematical backgrounds be successful in the calculus sequence without retaking a precalculus course Taalman's innovative text is the only book to interweave calculus with precalculus and algebra in a manner suitable for math and science majors not a rehashing or just in time review of precalculus and algebra but rather a new approach that uses a calculus level toolbox to examine the structure and behavior of algebraic and transcendental functions This book was written specifically to tie in with the material covered in Taalman Kohn Calculus Students who begin their calculus sequence with Calculus I with Integrated Precalculus can easily continue on to Calculus II using the Taalman Kohn text
