Fundamentals of Integrated Design for Sustainable Building Marian Keeler, Bill Burke, 2009-05-26 Resource added for the Architectural Technology program 106141

The Integrative Design Guide to Green Building 7group, Bill Reed, 2009-04-13 The members of 7group and Bill Reed are examples writ large of the kind of leadership that is taking this idea of green building and forming it into reality by helping change minds, building practice, and design process from the Foreword by S. Rick Fedrizzi, President, CEO, and Founding Chair, U.S. Green Building Council. A whole building approach to sustainability, the integrative design process offers a new path to making better green building decisions and addressing complex issues that threaten living systems. In *The Integrative Design Guide to Green Building: Redefining the Practice of Sustainability*, 7group's principals and integrative design pioneer Bill Reed introduce design and construction professionals to the concepts of whole building design and whole systems. With integrative thinking that reframes what sustainability means, they provide a how-to guide for architects, designers, engineers, developers, builders, and other professionals on incorporating integrative design into every phase of a project. This practical manual explains the philosophy and underpinnings of effective integrative design, addressing systems thinking and building and community design from a whole living system perspective. Details how to implement integrative design from the discovery phase to occupancy, supported by process outlines, itemized tasks, practice examples, case studies, and real-world stories illustrating the nature of this work. Explores the deeper understanding of integration that is required to transform architectural practice and our role on the planet. This book, both practical and thoughtful, will help you deliver your vision of a sustainable environment.

Green Building Illustrated Francis D. K. Ching, Ian M. Shapiro, 2014-03-03

Green Building Illustrated is a must read for students and professionals in the building industry. The combination of incredibly expressive illustrations and accessible technical writing make concepts of green building on paper as intuitive as they would be if you toured a space with experts in sustainable building. Rick Fedrizzi, President, CEO and Founding Chair of the U.S. Green Building Council. The authors of Green Building Illustrated deliver clear and intelligent text augmented by straightforward but compelling illustrations describing green building basics. This comprehensive book covers everything from the definition of green building to details of high performance design to sensible applications of renewable energy. This is a book with appeal for all architects and designers because it addresses general principles such as holistic and integrated design along with practical realities like affordability and energy codes. Green Building Illustrated describes a pathway for reaching Architecture 2030's carbon emission reduction targets for the built environment. Ed Mazria, founder of Architecture 2030, a neophyte will have a very good overview of all the factors involved in green building. I see some excellent pedagogy at work. Jim Gunshinan, Editor, Home Energy Magazine. Francis D. K. Ching brings his signature graphic style to the topic of sustainable design. In the tradition of the classic Building Construction Illustrated, Francis D. K. Ching and Ian M. Shapiro offer a graphical presentation to the theory, practices and complexities of sustainable design using an approach that proceeds methodically. From the outside to the inside of a building, they cover all aspects of sustainability, providing a framework and detailed strategies to design buildings that are substantively green. The book begins with an explanation of why we need to build green, the theories behind it, and current rating systems before moving on to a comprehensive discussion of vital topics. These topics include site selection, passive design, using building shape, water conservation, ventilation and air quality, heating and cooling, minimum impact materials and much more. Explains the fundamental issues of sustainable design and construction in a beautifully illustrated format. Illustrated by legendary author, architect and draftsman Francis D. K. Ching with text by recognized engineer and researcher Ian M. Shapiro. Ideal for architects, engineers and builders as well as students in these fields. Sure to be the standard reference on the subject for students, professionals and anyone interested in sustainable design and construction of buildings. Green Building Illustrated is an informative, practical and graphically beautiful resource.
