Leading in the Digital World

Amit S. Mukherjee, 2020-02-25 The definitive book on leadership in the digital era why digital technologies call for leadership that emphasizes creativity collaboration and inclusivity Certain ideas about business leadership are held to be timeless and certain characteristics of leaders often including a square jaw a deep voice and extroversion are said to be universal In Leading in the Digital World Amit Mukherjee argues that since digital technologies are changing everything else how could they not change leadership ideologies and styles As more people worldwide participate equally in business those assumptions of a leader s ideal profile have become irrelevant Offering a radical rethinking of leadership Mukherjee shows why digital technologies call for a new kind of leader one who emphasizes creativity collaboration and inclusivity Drawing on a global survey of 700 mid tier to senior executives and interviews with C level executives from around the world Mukherjee

explains how digital technologies are already reshaping organizations and work and what this means for leaders For example globally dispersed businesses can't reserve key leadership roles for people from exclusive groups leadership must become inclusive or fail Leaders must learn to collaborate in a multipolar world of networked organizations working with co located and non co located colleagues Leaders must lead for creativity rather than productivity Focusing on practice Mukherjee outlines goals and strategies warns against unthinking assumptions and explains how leaders can identify the mindsets behaviors and actions they need to pursue With *Leading in the Digital World* Mukherjee offers the definitive book on leadership for the digital era

caregivers and gives them the support they need to fulfill the patient promise with every care experience every day **The Phoenix Encounter Method: Lead Like Your Business Is on Fire!** Ian C. Woodward,V. "Paddy" Padmanabhan,Sameer Hasija,Ram Charan,2020-10-27 A radical new leadership strategy to transform business as we know it from a dream team of INSEAD professors and mega bestselling author Ram Charan The business landscape is littered with the wreckage of companies that crashed and burned when an apocalypse came in the shape of new competitive technologies upstart entrants demographic shifts and new world orders Who can feel safe in firestorm change The authors of The Phoenix Encounter Method don t advise safety In fact their method of leadership thinking requires you to imagine burning your business to the ground throwing yourself into a firestorm change and turning the upheaval to your organization s advantage It can then rise phoenix like from the ashes stronger and more powerful than ever Written with a sense of urgency and purposefully radical provocation The Phoenix Encounter Method represents the forward thinking of legendary business guru Ram Charan and professors from the senior global leadership program of INSEAD one of the world s top graduate business schools The resulting methodology based on analysis of thousands of articles studies reports and academic and business practice was field tested in real life Phoenix Encounters conducted with more than fifteen hundred senior executives from startups and family businesses to legacy companies representing a broad range of industry and sectors in both developed and developing economies Whatever your sector or industry if you re responsible for your organization s ability to use change as a transformative opportunity you ll appreciate the dramatic impact The Phoenix Encounter Method will have on you your leadership and your organization **Big Data for Big Decisions** Krishna Pera,2022-12-30 Building a data driven organization DDO is an enterprise wide initiative that may consume and lock up resources for the long term Understandably any organization considering such an initiative would insist on a roadmap and business case to be prepared and evaluated prior to approval This book presents a step by step methodology in order to create a roadmap and business case and provides a narration of the constraints and experiences of managers who have attempted the setting up of DDOs The emphasis is on the big decisions the key decisions that influence 90% of business outcomes starting from decision first and reengineering the data to the decisions process chain and data governance so as to ensure the right data are available at the right time every time Investing in artificial intelligence and data driven decision making are now being considered a survival necessity for organizations to stay competitive While every enterprise aspires to become 100% data driven and every Chief Information Officer CIO has a budget Gartner estimates over 80% of all analytics projects fail to deliver intended value Most CIOs think a data driven organization is a distant dream especially while they are still struggling to explain the value from analytics They know a few isolated successes or a one time leveraging of big data for decision making does not make an organization data driven As of now there is no precise definition for data driven organization or what qualifies an organization to call itself data driven Given the hype in the market for big data analytics and AI every CIO has a budget for analytics but very little clarity

on where to begin or how to choose and prioritize the analytics projects Most end up investing in a visualization platform like Tableau or QlikView which in essence is an improved version of their BI dashboard that the organization had invested into not too long ago The most important stakeholders the decision makers are rarely kept in the loop while choosing analytics projects This book provides a fail safe methodology for assured success in deriving intended value from investments into analytics It is a practitioners handbook for creating a step by step transformational roadmap prioritizing the big data for the big decisions the 10% of decisions that influence 90% of business outcomes and delivering material improvements in the quality of decisions as well as measurable value from analytics investments The acid test for a data driven organization is when all the big decisions especially top level strategic decisions are taken based on data and not on the collective gut feeling of the decision makers in the organization
