**Dslr Photography** James Henderson, 2017-04-06 Everyone knows that those who learn DSLR photography take much better photographs than those who just use a point and shoot camera Learning how to use the aperture and shutter speeds on a camera is what allows the shooter to control the artistic and technical outcome of a picture You see those gorgeous photos of sunsets over the ocean or fireworks in the night sky but when you attempt to take those same pictures they come out dull underexposed and flat looking The reason they do is that to capture those types of pictures you need to know how to use the aperture and shutter speed For example did you know that when you re shooting a sunset photo of a landscape you need a wide aperture and a long shutter speed It means the aperture must be open wide so that everything is captured in focus And the shutter speed must be slow enough to allow extra light in to fully absorb the broad spectrum of colors And if you don t do those two things on a camera dull drab images will be what you get Of course getting great photos of sunsets isn t the only reason to learn DSLR photography Taking close up images of family and friends with a soft out of focus background and perfect lighting is another big reason Imagine taking photos of your family that are beautiful enough to frame and hang as art These are just a few reasons why every family should have at least one person learning DSLR photography If you want to find out more about DSLR photography the fun and easy way this beginner s guide comes with an in camera guide that will teach you the basics of photography It s like carrying around a book or class inside of the camera It is an entry level lesson for those wanting to learn more about photography take more professional cameras and graduate up from the point and
