Big Five Persoonlijkheidstest:

Applied Cyberpsychology A. Attrill, C. Fullwood, 2016-04-29 Cyberpsychology is an emerging area of psychological study that aims to understand and explain all facets of online behaviour. This book brings together overviews from a number of leading authorities in the field to suggest how academic theory and research can be applied to a variety of online behaviours. Both positive and negative behaviours are considered including topics as diverse as parenting the online child, age-related internet usage and cultural considerations in online interactions. Psychological research can no longer view online and offline worlds as different entities but must consider online behaviours as equally distinct as offline activities. This is especially apparent when looking at online dating, the role that social networks play in organisations and online consumer behaviours and in a consideration of the role that psychological research plays in underpinning the multi-billion pound gaming industry. Focusing on these personal applications of the Internet, insight is also offered into the role that theory and research plays in training military personnel as well as the use of psychometric testing to select and retain employees.

Youth 2.0: Social Media and Adolescence Michel Walrave, Koen Ponnet, Ellen Vanderhoven, Jacques Haers, Barbara Segaert, 2016-04-28 This book grasps the duality between opportunities and risks which arise from children's and adolescents' social media use. It investigates the following main themes from a multidisciplinary perspective: identity, privacy, risks and empowerment. Social media have become an integral part of young people's lives. While social media offer adolescents opportunities for identity and relational development, adolescents might also be confronted with some threats. The first part of this book deals with how young people use social media to express their developing identity. The second part revolves around the disclosure of personal information on social network sites and concentrates on the tension between online self-disclosure and privacy. The final part deepens specific online risks young people are confronted with and suggests solutions by describing how children and adolescents can be empowered to cope with online risks. By emphasizing these different but intertwined topics, this book provides a unique overview of research resulting from different academic disciplines such as Communication Studies, Education, Psychology and Law. The outstanding researchers that contribute to the different chapters apply relevant theories, report on topical research, discuss practical solutions and reveal important emerging issues that could lead to future research agendas.

The Oxford Handbook of Nonsuicidal Self-Injury Elizabeth Lloyd-Richardson, Imke Baetens, Janis L. Whitlock, 2024 The Oxford Handbook of Nonsuicidal Self-Injury is a compendium of up-to-date research and knowledge of topics germane to the field of nonsuicidal self-injury (NSSI). Edited by renowned scholars Elizabeth E. Lloyd-Richardson, Imke Baetens, and Janis L. Whitlock, the handbook brings together cutting-edge research from a group of internationally distinguished scholars. It covers a wide array of topics including epidemiology, function, neurophysiological processes, lived experience, and intervention and prevention approaches. This comprehensive text will serve as a go-to guide for scholars, clinicians, and anyone with interest in understanding, treating, and preventing self-injury. **Kijk op de**
