Sarojam, 2003 Off the Grid Homes Lori Ryker, 2009-09 An in depth look at the strategies employed in sustainable home design *Exploring Intersemiotic Translation Models* Haoxuan Zhang, 2023-06-29 This volume sets out a new paradigm in intersemiotic translation research drawing on the films of Ang Lee to problematize the notion of films as the simple binary of transmission between the verbal and non verbal The book surveys existing research as a jumping off point from which to consider the role of audiovisual dimensions going beyond the focus on the verbal as understood in Jakobsonian intersemiotic translation The volume outlines a methodology comprising a system of various models which draw on both translation studies and film studies frameworks with each model illustrated with examples from Ang Lee s *Crouching Tiger Hidden Dragon* *Lust*

Caution and Life of Pi In situating the discussion within the work of a director whose own work straddles East and West and remediates between cultures and semiotic systems Zhang argues for an understanding of intersemiotic translation in which films are not simply determined by verbal source material but through the process of intersemiotic translators mediating non verbal quality determining materials into the final film The volume looks ahead to implications for translation and film research more broadly as well as other audiovisual media This book will appeal to scholars interested in translation studies film studies media studies and cultural studies in general      **Materials and Sustainable Development** Michael F.

Ashby,2015-01-19 This book from noted materials selection authority Mike Ashby provides a structure and framework for analyzing sustainable development and the role of materials in it The aim is to introduce ways of exploring sustainable development to readers in a way that avoids simplistic interpretations and approaches complexity in a systematic way There is no completely right answer to questions of sustainable development instead there is a thoughtful well researched response that recognizes concerns of stakeholders the conflicting priorities and the economic legal and social aspects of a technology as well as its environmental legacy The intent is not to offer solutions to sustainability challenges but rather to improve the quality of discussion and enable informed balanced debate Winner of a 2016 Most Promising New Textbook Award from the Textbook and Academic Authors Association Describes sustainable development in increasingly detailed progression from a broad overview to specific tools and methods Six chapter length case studies on such topics as biopolymers electric cars bamboo and lighting vividly illustrate the sustainable development process from a materials perspective Business and economic aspects are covered in chapters on corporate sustainability and the circular materials economy Support for course use includes online solutions manual and image bank      Natural Fibre Reinforced Cement and Concrete R.
