Basta De Historias La Obsesion Latinoamericana Con El Pasado Y Las 12 Claves Del Futuro Andres Oppenheimer:

¡Basta de historias! Andres Oppenheimer,2010 Argues that the obsession of many Latin American countries with their history blinds them to their most pressing need to improve their education systems so that they can compete in the new information economy

¡Vamos a Avanzar! Robert Niebuhr,2021-08 In Vamos a avanzar Robert Niebuhr argues that despite widespread corruption a lack of skills and failed policies Bolivian leaders in the first half of the twentieth century created a modern state because of the profound role of warfare over the Chaco When President Daniel Salamanca hastily thrust his isolated and poverty stricken country into the devastation of the Chaco War against Paraguay in 1932 he unleashed a number of forces that had been brewing inside and outside of Bolivia all of which combined to bring Bolivia a truly modern national identity and state building program This conflict was the defining moment whereby rhetoric and populism took on a broader meaning among the newly mobile populace especially the Indigenous war veterans as the Bolivians proclaimed Vamos a avanzar Let s move forward With the final revolution of 1952 politics in Bolivia became more modern than they had been in the period of the Chaco War or during the populist leanings of all post 1899 governments Niebuhr offers a fresh contribution showing the importance of the turbulent populist politics of the period after 1899 and the significance of the Chaco War as the most influential revolutionary event in modern Bolivian history

ENGLISH DESCRIPTION Staying true to his trademark journalistic approach Andr s Oppenheimer takes his readers on yet another journey this time across the globe in a thought provoking search to understand what the future holds for today s jobs in the foreseeable age of automation The Robots Are Coming centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services As two of Oppenheimer s interviewees both experts in technology and economics from Oxford University indicate forty seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years Oppenheimer examines current changes in several fields including the food business legal work banking and medicine speaking with experts in the field and citing articles and literature on automation in various areas of the workforce He contrasts the perspectives of techno optimists with those of techno negativists and generally attempts to find a middle ground between an alarmist vision of the future and one that is too uncritical A self described cautious optimist Oppenheimer believes that technology will not create massive unemployment but rather will drastically change what work looks like
