Kassouf, 1967      **Beat the Market ; a Scientific Stock Market System** Edward O. & Kassouf Thorp, 1978      The Quants Scott Patterson, 2010-02-02 With the immediacy of today's NASDAQ close and the timeless power of a Greek tragedy The Quants is at once a masterpiece of explanatory journalism a gripping tale of ambition and hubris and an ominous warning about Wall Street's future In March of 2006 four of the world's richest men sipped champagne in an opulent New York hotel They were preparing to compete in a poker tournament with million dollar stakes but those numbers meant nothing to them They were accustomed to risking billions On that night these four men and their cohorts were the new kings of Wall Street Muller Griffin Asness and Weinstein were among the best and brightest of a new breed the quants Over the prior twenty years this species of math whiz technocrats who make billions not with gut calls or fundamental analysis but with formulas and high speed computers had usurped the testosterone fueled kill or be killed risk takers who'd long been the alpha males the world's largest casino The quants helped create a digitized money trading machine that could shift billions around the globe with the click of a mouse Few realized though that in creating this unprecedented machine men like Muller Griffin Asness and Weinstein had sowed the seeds for history's greatest financial disaster Drawing on unprecedented access to these four number crunching titans The Quants tells the inside story of what they thought and felt in the days and weeks when they helplessly watched much of their net worth vaporize and wondered just how their mind bending formulas and genius level IQ's had led them so wrong so fast      **The ^AOxford Handbook of the Economics of Gambling** Leighton Vaughan Williams, Donald S. **Markets in Profile** James F. Dalton, Robert B. Dalton, Eric T. Jones, 2011-01-11 Markets in Profile explores the confluence of three disparate philosophical frameworks the Market Profile behavioral finance and neuroeconomics in order to present a unified theory of how markets work The Market Profile is an ever evolving multidimensional graphic that gives visual form to the market's continuing auction process revealing the myriad underlying dynamics that influence market activity Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by rationality when making investment decisions And neuroeconomics is the study of how investor psychology permeates and affects the financial markets Mr Dalton explicates the ways in which irrational human behavior influences the market's natural auction process creating frequently predictable market structure which results in opportunities for investors to ameliorate risk The book will improve investors ability to interpret change in markets enabling better more confident investment decisions
