

## SONATA

dedicata al Conte von Waldstein

Op. 53.

Composta nel 1804,  
pubblicata in maggio 1805  
presso il "Bureau des arts  
et de l'industrie," di Lipsia.

21. Allegro con brio  $\text{♩} = 168 - 178$

*pp legg. e soffavoce*

1 C.  $\frac{4}{4}$  (senza pedale)

*pp*

*cresc. a corde*

*decresc.*

1 C.  $\frac{4}{4}$

a) Below recommends di equiparare la  $\text{♩}$  a  $\text{♩}$  senza corona. Però avendo la corona per scopo di spezzare momentaneamente il ritmo, e non soddisfacendo affatto a ciò il semplice raddoppio aritmetico della battuta, lo raccomanderei invece:

ecc., oppure, a seconda

della sonorità del pianoforte:

ecc.

a) Below recommends d'égaler la  $\text{♩}$  a  $\text{♩}$  sans point d'orgue. Pourtant le point d'orgue, ayant pour but de briser momentanément le rythme, et le simple redoublement arithmétique n'y atteignant pas, je recommanderais au contraire:

etc. ou bien

sauvant la sonorité du piano.

a) Below recommends the equalizing of  $\text{♩}$  with  $\text{♩}$  without a pause. However the aim of the pause being momentarily to break the rhythm, and the simple arithmetic reduplication failing to do so, I, on the

contrary, recommend:

etc.

or also:

etc. according

to the sonority of the instrument.

## **Beethoven Waldstein Sonata Harmonic Analysis:**

**Classical Form** William E. Caplin, 1998-05-14 Building on ideas first advanced by Arnold Schoenberg and later developed by Erwin Ratz this book introduces a new theory of form for instrumental music in the classical style The theory provides a broad set of principles and a comprehensive methodology for the analysis of classical form from individual ideas phrases and themes to the large scale organization of complete movements It emphasizes the notion of formal function that is the specific role a given formal unit plays in the structural organization of a classical work **Beethoven** Michael Spitzer, 2017-07-05 Our image of Beethoven has been transformed by the research generated by a succession of scholars and theorists who blazed new trails from the 1960s onwards This collection of articles written by leading Beethoven scholars brings together strands of this mainly Anglo American research over the last fifty years and addresses a range of key issues The volume places Beethoven scholarship within a historical and contemporary context and considers the future of Beethoven studies *Hugo Riemann and the Birth of Modern Musical Thought* Alexander Rehding, 2003-05 Generally acknowledged as the most important German musicologist of his age Hugo Riemann 1849 1919 shaped the ideas of generations of music scholars not least because his work coincided with the institutionalisation of academic musicology around the turn of the last century This influence however belies the contentious idea at the heart of his musical thought an idea he defended for most of his career harmonic dualism By situating Riemann s musical thought within turn of the century discourses about the natural sciences German nationhood and modern technology this book reconstructs the cultural context in which Riemann s ideas not only made sense but advanced an understanding of the tonal tradition as both natural and German Riemann s musical thought from his considerations of acoustical properties to his aesthetic and music historical views thus regains the coherence and cultural urgency that it once possessed **Composition, Chromaticism and the Developmental Process** Henry Burnett, Roy Nitzberg, 2007 Musicology having been transmitted as a compilation of disparate events and disciplines has long necessitated a magic bullet a unified field theory so to speak that can interpret the steady metamorphosis of Western art music from late medieval modality to twentieth century atonality within a single theoretical construct Burnett and Nitzberg challenge the traditional understanding of development and advance a new theory of eleven pitch tonality as it relates to the corpus of Western composition The book plots the evolution of tonality and its bearing on style and the compositional process itself The authors move beyond existing theory and analysis to base their theory from the standpoint of chromatic pitch fields These fields are the specific chromatic pitch choices that a composer uses to inform and design a complete composition utilizing specific chromatic inflections to control a large scale working out process that is the very essence of development In short the authors claim that a chromatic background that coexists with a diatonic contrapuntal background may define the process of compositional development These chromatic and diatonic events are the two genus expressions of slowly unfolding tonic octaves [A Topical Guide to Schenkerian Literature](#) David Carson

Berry, 2004 To the growing list of Pendragon Press publications devoted to the work of Heinrich Schenker we wish to announce the addition of this much needed bibliography The author a student of Allen Forte has created a work useful to a wide range of researchers music theorists musicologists music librarians and teachers The Guide is the largest Schenkerian reference work ever published At nearly 600 pages it contains 3600 entries 2200 principal 1400 secondary representing the work of 1475 authors Fifteen broad groupings encompass seventy topical headings many of which are divided and subdivided again resulting in a total of 271 headings under which entries are collected *Harvard Dictionary of Music* Willi Apel, 1969 Contains nearly 1000 pages of precise and accessible information on all musical subjects **Melody and Harmony** Stewart Macpherson, 1920 **Harmony in Time** Andrew Powell, 2010 Harmonic expectations in Western tonal music are formed throughout an individual's lifetime created by the encounter of commonly recurring patterns of relationships of chords within music The recognition and identification of these patterns particularly when the anticipated patterns are denied are expressed on a conscious level Although identified and articulated from the conscious experience a listener's attention may not be actively engaged in harmonic processing moreover the identification of deviations may arise from nonconscious processing of harmonic events This paper identifies the processes in formulating and expressing harmonic expectation and its subsequent denial as well as the nonconscious processing which influences this recognition Additionally this paper theorizes that expectations on a larger scale beyond the chordal level may be generated and fulfilled nonconsciously This paper concludes with an analysis of Beethoven's Waldstein Sonata identifying moments of conflict between small scale denials of expectations within the fulfillment of large scale processes The Musical Times and Singing-class Circular, 1879 *The Musical Leader*, 1929 **The University Course of Music Study, Piano Series**, 1920 **The University Course of Music Study, Piano Series**, 1919 **Theory and Practice**, 1982 **Beethoven and the Creative Process** Barry A. R. Cooper, 1990 Beethoven's habit of composing by making many preliminary drafts and sketches was sufficiently unusual to attract attention even during his lifetime and his creative process has attracted a good deal more attention since This book incorporates the findings of recent studies on Beethoven's creative process and examines his underlying creative motivation the interrelationships between his various works and how his output was determined by external factors and his personal life Including an introduction to his compositional methods and a detailed study of particular compositional problems of six different works the book provides insight into the creative life of one of the greatest figures in musical history Beethoven's Sketches Paul Mies, 1929 *Musical Times and Singing Class Circular*, 1895 *Examples for Use in the Study of Musical Style*, 1950 **The Beethoven Journal**, 1995 **Harmony in Tonal Music: Chromatic practices** Joel Lester, 1982 **Examples for the Study of Musical Style**, 1970
