INTRODUCTION Welcome to the new Prentice Hall Reviews and Rationales Series. This 9 book series has been specifically designed to provide a clear and concentrated review of important nursing knowledge in the following content areas: Child Health Nursing, Maternal Newborn Nursing, Mental Health Nursing, Medical Surgical Nursing, Pathophysiology, Pharmacology, Nursing Fundamentals, Nutrition and Diet Therapy, Fluids, Electrolytes.

Often this is the person with the health problem, but it may also be a significant other, relative, friend, or another nurse. Decide whether the stem is a true response stem or a false response stem. With a true response stem, the correct answer will be a true statement, and vice versa. Determine what the question is really asking, sometimes referred to as the issue of the question. Evaluate all answer options in relation to this issue and not strictly to the correctness of the statement in each individual option. Eliminate options that are obviously incorrect, then go back and reread the stem. Evaluate the remaining options against the stem once more. If two answers seem similar and correct, try to decide whether one of them is more global or comprehensive. If the global option includes the alternative option within it, it is likely that the more global response is the correct answer.

THE NCLEX RN LICENSING EXAMINATION The NCLEX RN licensing examination is a Computer Adaptive Test (CAT) that ranges in length from 75 to 265 individual stand-alone test items, depending on individual performance during the examination. Upon graduation from a nursing program, successful completion of this exam is the gateway to your professional nursing practice. The blueprint for the exam is reviewed and revised every three years by the National Council of State Boards of Nursing according to the results of a job analysis study of new graduate nurses practicing within the first six months after graduation. Each question on the exam is coded to one Client Need Category and one or more Integrated Concepts and Processes.

Client Need Categories There are 4 categories of client needs, and each exam will contain a minimum and maximum percent of questions from each category. Each major category has subcategories within it. The Client Need categories according to the NCLEX RN Test Plan effective April 2001 are as follows:

- Safe Effective Care Environment: Management of Care 7 13%, Safety and Infection Control 5 11 %
- Health Promotion and Maintenance: Growth and Development Throughout the Lifespan 7 13%, Prevention and Early Detection of Disease 5 11 %
- Psychosocial Integrity: Coping and Adaptation 5 11%, Psychosocial Adaptation 5 11%
- Physiological Integrity: Basic Care and Comfort 7 13%, Pharmacological and Parenteral Therapies 5 11%, Reduction of Risk Potential 12 18 %, Physiological Adaptation 12 18 %

Integrated Concepts and Processes The integrated concepts and processes identified on the NCLEX RN Test Plan effective April 2001 with condensed definitions are as follows:

- Nursing Process** a scientific problem solving approach used in nursing practice consisting of assessment, analysis, planning, implementation, and evaluation.
- Caring** client nurse interaction characterized by mutual respect and trust and directed toward achieving desired client outcomes.
