Recent Developments in Chinese Urban Planning Qisheng Pan,Jason Cao,2015-08-27 This book provides a comprehensive overview of the most recent development of Chinese cities It discusses a broad range of subjects of urban planning including environmental planning transportation planning historical preservation economic development geographic information systems GIS and other technological applications China the most populous country in the world has experienced unprecedented urbanization in a relatively short period During the past decades urbanization in China has centered on land development through industrialization and investment but it has largely ignored the prosperity and well being of the people Livable cities are not just those with magnificent buildings and infrastructure they are great places where people want to live China s recently inaugurated leaders have proposed a new model to actively and prudently enhance the quality of urbanization through compact intelligent and low carbon development It symbolizes the departure from land centered urban development to a form of people oriented urbanization as China s Premier Li Keqiang has advocated This new model offers a platform for planning researchers and practitioners to tackle urbanization challenges such as social equity environment energy ecological and historic preservation affordable housing and externalities of mega cities Furthermore people oriented urbanization calls for public participation and stakeholder engagement in the planning process This book brings together planners designers scholars scientists and government officials from China and all over the world to exchange ideas on urban regeneration

Sustainable Development and Planning III A. Kungolos,C. A. Brebbia,Ēlias Beriatos,2007 In recent years in many countries there has been an increase in spatial problems that has led to planning crisis Planning problems often connected

with uneven development deterioration of the quality of urban life and destruction of the environment The increase urbanisation of the world coupled with global issues of the environmental pollution resource shortage and economic restructuring demand that we make our cities places worth living in Problems of environmental management and planning are not restricted to urban areas Environments such as rural areas forests coastal regions and mountains face their own problems that require urgent solutions in order to avoid irreversible damages The use of modern technologies in planning gives us new potential to monitor and prevent environmental degradation Effective strategies for management should consider planning and regional development two closely related disciplines and emphasise the demand to handle these matters in an integrated way Containing papers presented at the Third International Conference on Sustainable Development and Planning this book addresses the subjects of regional development in an integrated way as well as in accordance with the principles of sustainability Notable topics include Regional Planning City Planning Rural Development Environmental Impact Assessment Environmental Management Environmental Legislation and Policy Integrated Territorial and Environmental Risk Analysis Ecosystems Analysis Protection and Remediation Social and Cultural Issues Environmental Economics Geo Informatics Urban Landscapes Transportation Waste Management and Resources Management **Geographical**
