**Contending Theories of International Relations [by] James E. Dougherty [and] Robert L. Pfaltzgraff, Jr** James E. Dougherty, 1917 **International Relations and Scientific Progress** Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories Such theorizing appears to be out of favor as the result of the apparent failure by structural realism the most prominent system level theory over the last two decades on any number of fronts most notably an inability to anticipate the ending of the Cold War and its aftermath This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of Theory of International Politics which created structural realism more than two decades ago With appropriate revisions however structural realist theory can compete effectively and reclaim its primacy The first part of International Relations and Scientific Progress assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international

conflict crisis and war This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential By comparison the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated Part Three sums up the work and explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system *Systems, Relations, and the Structures of International Societies* Jack Donnelly, 2023-11-02 Argues that systems approaches are necessary in order to identify and understand important features of the world

**International Relations and the First Great Debate** Brian Schmidt, 2013-08-15 This book provides an authoritative account of the controversy about the first great debate in the field of International Relations Of all the self images of International Relations none is as pervasive and enduring as the notion that a great debate pitting idealists against realists took place in the 1940s The story of the first great debate continues to structure the contemporary identity of International Relations yet in recent years revisionist historians have challenged the conventional wisdom that the field experienced such a debate Drawing on expert contributors working in Canada Europe the United Kingdom and the United States this book includes key participants in the historiographical controversy The book assembles the existing scholarship and provides a thorough analysis of the status of the first great debate in the history of International Relations It is an invaluable examination of the causes and future direction of idealist and realist arguments International Relations and the First Great Debate will be of interest to students and scholars concerned with the foundations of International Relations

Cyber Blockades Alison Lawlor Russell, 2014-11-05 Cyber Blockades is the first book to examine the phenomena of blockade operations in cyberspace large scale attacks on infrastructure or systems that aim to prevent an entire state from sending or receiving electronic data Cyber blockades can take place through digital physical and or electromagnetic means Blockade operations have historically been considered acts of war thus their emergence in cyberspace has significant implications for international law and for our understanding of cyber warfare The author defines and explains the emerging concept of cyber blockades and presents a unique comparison of blockade operations in five different domains on land at sea in the air in space and in cyberspace identifying common elements as well as important distinctions Alison Lawlor Russell s framework for defining cyber blockades understanding how they occur and considering the motivations of actors who employ them is applied with in depth analysis of the cyber attacks on Estonia in 2007 and on Georgia during the 2008 Georgia Russia War Blockade operations have occurred in cyberspace and will doubtlessly be used again in the future by both state and non state actors alike because of the unique advantages of this type of attack This book offers recommendations for policymakers contemplating or confronted by such attacks Cyber Blockades is also a must read for scholars and students of security studies terrorism substate groups and the future of warfare

*Constructing a Chinese School of International Relations* Yongjin Zhang, Teng-Chi Chang, 2016-06-10 This edited volume offers arguably the first

systemic and critical assessment of the debates about and contestations to the construction of a putative Chinese School of IR as sociological realities in the context of China's rapid rise to a global power status Contributors to this volume scrutinize a particular approach to worlding beyond the West as a conscious effort to produce alternative knowledge in an increasingly globalized discipline of IR Collectively they grapple with the pitfalls and implications of such intellectual creativity drawing upon local traditions and concerns knowledge claims and indigenous sources for the global production of knowledge of IR They also consider critically how such assertions of Chinese voices and articulation of their ambition for theoretical innovation from the disciplinary margins contribute to the emergence of a Global IR as a truly inclusive discipline that recognizes its multiple and diverse foundations Reflecting the varied perspectives of both the active participants in the Chinese School of IR debates within China and the observers and critics outside China this work will be of great interest to students and scholars of IR theory Non Western IR and Chinese Studies
