Transfer Pricing Aspects of Intra-Group Financing Raffaele Petruzzi, 2013-10-20

For corporate managers maximization of the profits and the market value of the firm is a prime objective The logical working out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies principally on account of the very attractive tax advantages made possible Inevitably numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions This important book one of the first in depth analysis of the current worldwide working of transfer pricing in intra group financing and its resonance in law presents the relevant issues related to loans financial guarantees and cash pooling analyses an innovative possible approach to these issues and describes new methodologies that can be implemented in practice in order to make intra group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle Comparing the tax measures implemented in the corporate tax law systems of forty countries this study investigates such aspects of intra group financing as the following corporate finance theories studies and surveys regarding financing decisions application of the arm's length principle to limit the deductibility of interest expenses impact of the OECD's Base Erosion and Profit Shifting BEPS project transfer pricing issues related to intra group financing credit risk in corporate finance rationales utilized by credit rating agencies and the assessment of arm's length nature of intra group financing The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized The solutions and methodologies proposed are applicable to any business sector Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world this thorough assessment and analysis will prove extraordinarily useful for in house and advisory practitioners corporate officers academics international organizations and government officials charged with finding effective responses to the serious issues raised In addition to its well researched analysis the book's comparative overview of how loans financial guarantees and cash pooling are currently

addressed by OECD Member States and by their national courts is of great practical value in business decision making

Case of Tourism Enterprises Dawid Szutowski, 2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research

has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm's innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises Corporate Finance Jonathan Berk, Peter DeMarzo, 2013-04-18 This third edition reflects the constantly changing world of finance including information on the recent financial crisis new behavioural finance research and updated practitioner interviews What is the Bootstrap Effect? Merger & Acquisition-Activities and their Influence on Stock Prices Florian Beyer, 2020-04-08 Seminar paper from the year 2017 in the subject Business economics Investment and Finance grade 1.7 The FOM University of Applied Sciences Hamburg language English abstract This paper will examine the question of how M&A activities influence a company's stock price and earnings per share EPS especially if the bootstrap effect occurs In 2016 the global mergers and acquisitions M&A activities decreased by about 18 percent compared to 2015 Altogether 17 369 deals with a value of 3.2 trillion tn US Dollars USD were performed There are numerous reasons to invest and divest in inorganic growth Organic growth has its limitations

thus acquiring competitors growing vertically or horizontally as well as accessing new markets are strong motivators to do so Growing a business is often linked with going public The decision to be part of the stock market and to perform M A influences an enterprise s value for various reasons To approach these questions the first chapter gives a general overview of reasons motivators risks and benefits of M A Thereafter the influence of M A on a company s shareholder value and EPS is examined Then the bootstrap effect is explained and subsequently illustrated by an exemplary M A transaction Afterwards the risks and benefits of bootstrapping and M A are analysed to consider its usefulness and influence on the share price and EPS *Study Guide for Corporate Finance, Second Edition, [by] Jonathan Berk, Peter DeMarzo Mark Simonson,2011*
