

## CORRUPTION: CAUSES, CONSEQUENCES AND CURES

U Myint\*

*The paper stresses the need to keep the issue of corruption squarely in view in the development agenda. It discusses the causes and consequences of corruption, especially in the context of a least developed country with considerable regulation and central direction. Lack of transparency, accountability and consistency, as well as institutional weaknesses such as in the legislative and judicial systems, provide fertile ground for growth of rent seeking activities in such a country. In addition to the rise of an underground economy and the high social costs associated with corruption, its adverse consequences on income distribution, consumption patterns, investment, the government budget and on economic reforms are highlighted in the paper. The paper also touches upon the supply side of bribery and its international dimensions and presents some thoughts on how to address the corruption issue and to try and bring it under control.*

There is a growing worldwide concern over corruption at the present time. Several factors are responsible for this.

First, a consensus has now been reached that corruption is universal. It exists in all countries, both developed and developing, in the public and private sectors, as well as in non-profit and charitable organizations.

Second, allegations and charges of corruption now play a more central role in politics than at any other time. Governments have fallen, careers of world renowned public figures ruined, and reputations of well-respected organizations and business firms badly tarnished on account of it. The international mass media feeds on it and scandals and improper conduct, especially of those in high places, are looked upon as extremely newsworthy, and to be investigated with zeal and vigour. The rising trend in the use of corruption as a tool to discredit political opponents, the media's preoccupation with it as a highly marketable commodity, and the general public's fascination with seeing prominent personalities in embarrassing situations have brought

procurement corruption is to debar or disqualify corrupt suppliers from bidding for or otherwise obtaining government contracts This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts Implementing a disqualification mechanism in public procurement raises serious practical and conceptual difficulties which are not always considered by legislative provisions on disqualification Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre requisite to disqualification bearing in mind that corruption thrives in secret resulting in a dearth of convictions Another issue is determining how to balance the tension between granting adequate procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process A further issue is determining the scope of the disqualification in the sense of determining whether it applies to firms natural persons subcontractors subsidiaries or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts The book compares and contrasts the legal practical and institutional approaches to the implementation of the disqualification mechanism in the European Union the United Kingdom the United States the Republic of South Africa and the World Bank **Asia-Pacific**
