Crip Theory Cultural Signs Of Queerness And Disability Cultural Front:

Crip Theory Robert McRuer, 2006-06 McRuer makes a case that queer and disabled identities politics and cultural logics are inexorably intertwined and that queer and disability theory need one another Crip theory makes clear that no cultural analysis is complete without attention to the politics of bodily ability and alternative corporealities **The Routledge Companion to Art and Disability** Keri Watson, Timothy W. Hiles, 2022-03-30 The Routledge Companion to Art and Disability explores disability in visual culture to uncover the ways in which bodily and cognitive differences are articulated physically and theoretically and to demonstrate the ways in which disability is culturally constructed This companion is organized thematically and includes artists from across historical periods and cultures in order to demonstrate the ways in which disability is historically and culturally contingent The book engages with questions such as How are people with disabilities represented in art How are notions of disability articulated in relation to ideas of normality hybridity and anomaly How do artists use visual culture to affirm or subvert notions of the normative body Contributors consider the changing role of disability in visual culture the place of representations in society and the ways in which disability studies engages with and critiques intersectional notions of gender race ethnicity class and sexuality This book will be particularly useful for scholars in art history disability studies visual culture and museum studies **(Un)doing Diabetes: Representation, Disability, Culture** Bianca C. Frazer, Heather R. Walker, 2022-01-21 While the 21st century insulin crisis provokes protest and political dialogue public conception of diabetes remain firmly unchanged Popular media representations portray diabetes as a condition couched in lifestyle choices In the groundbreaking volume Un doing Diabetes authors destabilize depictions so powerful so subtle and so unquestioned that readers may find assertions counterintuitive Un doing Diabetes is the first collection of essays to use disability studies to explore representations of diabetes across a wide range of mediums from Twitter to TV and film to theater fiction fanfiction fashion and more This disability studies approach to diabetes locates individual experiences of diabetes within historical and contemporary social conditions In undoing diabetes authors deconstruct assumptions the public commonly holds about diabetes while writers doing diabetes present counter narratives community members create to represent themselves This collection will be of interest to scholars activists caregivers and those living with diabetes *Sexual Disorientations* Kent L. Brintnall, Joseph A. Marchal, Stephen D. Moore, 2017-11-07 Sexual Disorientations brings some of the most recent and significant works of queer theory into conversation with the overlapping fields of biblical theological and religious studies to explore the deep theological resonances of questions about the social and cultural construction of time memory and futurity Apocalyptic eschatological and apophatic languages frameworks and orientations pervade both queer theorizing and theologizing about time affect history and desire The volume fosters a more explicit engagement between theories of queer temporality and affectivity and religious texts and discourses

Architecture's Disability Problem Wanda Katja Liebermann, 2024-06-21 Architecture s Disability Problem explores the

intersection of architecture and disability in the United States from the perspective of professional practice This book uncovers why despite the profound effect of the Americans with Disabilities Act on the architectural profession there has been so little interest in design for disability in mainstream architecture To counter this the book investigates alternative approaches to designing with disability through three case studies These showcase both buildings and how design processes driven by disabled people shape design and professional roles Combining historical research formal and discourse analysis and interviews with people who design construct use buildings and advocate for access the book develops a social understanding of how the buildings work at functional affective and symbolic levels Architecture s Disability Problem is aimed at three primary readers practicing architects architectural scholars and members of disability scholar activist communities Grounded in detailed design studies the author hopes to unearth the social meaning making of architecture related to disability Ultimately the book makes an argument for a focus on disability in its own right as well as on the body in place of the dominance of formal object oriented approaches This book presents and argues for a fundamental shift in the way architectural education policy and practice views and engages with disability It will be key reading for students researchers practitioners and policy makers

Disability in German-speaking Europe Linda Leskau,Tanja Nusser,Katherine Sorrels,2022 This collection reflects on the development of disability studies in German speaking Europe and brings together interdisciplinary perspectives on disability in German Austrian and Swiss history and culture Ableism remains the most socially acceptable form of intolerance with pejoratives referencing disability and intellectual disability in particular remaining largely unquestioned among many Yet the understanding depiction and representation of disability is also clearly in a process of transformation This volume analyzes that transformation taking a close look at attitudes toward disability in historical and contemporary German speaking contexts The volume begins with an overview of the emergence and growth of disability studies in German speaking Europe against the background of the field s emergence a decade or so earlier in the US and UK The differences in timing

methodology and research concentrations bring into focus how each cultural context has shaped the field of disability studies in its multiple and diverse approaches Building on recent scholarship that uses a cultural studies approach the volume s three sections analyze constructs of disability and ability in history memory and culture The essays in the history section examine how the emotions morality and power have played into and still do play into the individual s experience of disability Those in the memory section grapple with the origins of the Nazi persecution of people with disabilities the fight for recognition of this genocide and the politics of its commemoration Finally the culture section offers close readings of disability in literary and filmic texts from the twentieth and twenty first centuries **Building Access** Aimi

Dangerous Discourses of Disability, Subjectivity and Sexuality Margrit Shildrick,2009-08-28 This book examines disability in the context of two areas subjectivity and sexuality in which it has been hitherto suppressed Using feminist and postmodernist analysis Margrit Shildrick explores what motivates the discrimination devaluation and alienation directed at disabled people and argues that the difference that disability encapsulates uncovers a psycho cultural imaginary that sustains modernist understandings of what constitutes an embodied subject Where autonomy is the most valued attribute of subjectivity any compromise of bodily control indication of connectivity or of corporeal instability mobilizes a deep seated anxiety in the normative majority that is most acute in relation to disability and sexuality By critiquing conventional paradigms this study shows how it becomes possible to celebrate the fluidity unpredictability and connectivity already

associated with disability and creatively queer understanding of the embodied self Using an analysis that draws on critical cultural theory emergent strands in critical disability studies postconventional philosophy and feminist theories of the body from Merleau Ponty to Haraway and Deleuze and social policy and legal discourse Shildrick argues for the need to contextualise disability as a matter of ethical import

comprehensive work that brings together disability studies feminist theory and queer theory Licia Carlson Providence College
