Deconstructing History Alun Munslow, 2006 Surveying the latest research this welcome second edition of Alun Munslow's successful *Deconstructing History* provides an excellent introduction to the debates and issues of postmodernist history. This new edition has been updated and revised and along with the original discussion material and topics now assesses the claims of history as a form of truthful explanation, discusses the limits of conventional historical thinking and practice, and the responses of the new empiricists to the book's central arguments. Examines the arrival of experimental history and its implications, clarifies the utility of addressing Michael Foucault and Hayden White, and strengthens the analysis of Frank R. Ankersmit's recent work. Along with an updated glossary and a revised bibliography, this second edition will not only live up to its predecessor's reputation but will surpass it as the most essential student resource for studying history and its practice. Challenging Theory: Discipline After Deconstruction Catherine Burgass, 2019-01-04 First published in 1999, this volume perceives that English literature is under threat as an academic discipline. In *Challenging Theory*, Catherine Burgass warns against the recent trend towards the conflation of literature teaching with cultural studies in British and American universities. Focusing on theory of deconstruction as developed by Jacques Derrida in the 1960s, the book redresses some common misinterpretations of Derrida's work relating to the status of metaphysical oppositions. Part One discusses textual differences and the ways in which these may dissolve and reform according to different cultural contexts. The practical issues associated with teaching literature and literary theory in universities are examined in Part Two, while Part Three highlights some of the more invidious claims of literary theorists and questions the value of metaphysical analysis as a tool for political critique. *Challenging Theory* tackles an important debate that lies at the heart of humanities teaching. It illuminates the impact on academia of the work of critical theorists over the last thirty years and provides a platform for future reassessment of the relationships between literature, philosophy, and theory.

Theorists Paul Hansom,2001 This award winning series systematically presents career biographies of writers from all eras and all genres through volumes dedicated to specific types of literature and time periods The Old English Riddles and the Riddlic Elements of Old English Poetry Rafat Boryslawski,Rafał Boryśławski,2004 The art of posing riddles is possibly as old as mankind and spans two apparent extremes which nevertheless converge in the riddlic form that of wisdom and that of play With this perspective in mind the author examines the poetic enigmas present in the culture of Anglo Saxon England exploring both the Anglo Latin riddles of Aldhelm and those recorded in the Exeter Book His study investigates the Old English riddlic texts from a variety of angles arguing for the possibility of establishing patterns of Anglo Saxon riddlic composition as such The author intends to prove that both the Exeter collection and the Aenigmata of Aldhelm are constructed on the grounds of an identifiable structure of interrelations and interdependencies Additionally he argues that the riddlic mode of literary representation is also visible in other Anglo Saxon poetic compositions The analysis of such an assumption leads to the conclusion that the predilection for the riddle form in Anglo Latin and Anglo Saxon poetry results from an Old English vision of the Christian world **BOOKJACKET** **Intercultural Encounters** Heinz Antor,Kevin Lee
