Anthropology Robert Louis Welsch, Luis Antonio Vivanco, Agustin Fuentes, 2025 Humans are fascinating and complex beings With our large brains flexible diets and ability to get around on two feet evolutionary

history has made us different from other primates and facilitated our adaptation to practically any environment on the planet. At the same time we are more than our biology and there is nothing we do that does not involve culture which encompasses our capacities for symbolic communication intensive social cooperation intergenerational learning and metaphysical thinking. These points raise some interesting questions: What is it about our humanity that distinguishes us from other species? What is culture and how does it shape our origins prehistoric pasts and present? How do we as humans construct meaningful social worlds? What are the reasons for human biological and cultural diversity? Such questions are at the core of the study of anthropology.

Urban Health and Society Nicholas Freudenberg, Susan Klitzman, Susan Saegert, 2009-07-08. Praise for *Urban Health and Society*: This is a spectacular resource for practitioners, policymakers, researchers, and students interested in improving the lives and health of individuals and families in urban settings. This book provides the most current frameworks, research, and approaches for understanding how unique features of the urban physical and social environments shape the health of over half of the world's population that is already residing in large cities. Its interdisciplinary research and practice focus is a welcome innovation.

Throughout the chapters, the book's attention to community participation, social justice, and equity, as well as interdisciplinary research methods, make it an invaluable resource.
