Crisis Of The Ottoman Empire Prelude To Collapse 1839 1878:

Crisis of the Ottoman Empire James J. Reid, 2000 This work focuses upon the military problems of the Ottoman Empire in the era 1839 to 1878 The author examines the Crimean War 1853 to 1856 from the perspective of the Ottoman army using British and French sources as well as the few available Ottoman materials Scholarship on the war has ignored this aspect but the high quality of work about the British French and Russian involvement in the war has enabled the present study to advance its own work The inability of the Ottoman high command to learn the lessons of the Crimean War led to serious defeats in the Russo Turkish War of 1877 1878 Revolts occurring in this period also receive attention While the book analyzes the nature of war in the Balkans and Anatolia its primary objective is the study of the war s social and psychological influences This perspective runs as a theme throughout the book but the author focuses on the psychological aspects in the final chapter using comparative perspectives

Conspiracy Theories in Turkey Doğan Gürpınar, 2019-05-29 Conspiracy theories are no longer just a curiosity for aficionados but a politically salient theme in the age of Trump Brexit and fake news One of the countries that has been entrapped in conspiratorial visions is Turkey and this book is the first comprehensive survey in English of the Turkish conspiratorial mind set It provides a nuanced overview of the discourses of Turkish conspiracy theorists and examines how these theorists argue for and legitimize their worldview The author discusses a broad range of conspiracy theories including some influenced by Kemalist and Islamist perspectives as well as those of the ruling Justice and Development Party The most influential authors books references and images within the conspiracist milieu are all examined in detail This book will be an important source for scholars interested in extremism in Turkey and the societal and political impact of conspiracy theories

Between Freedom and Progress David Prior, 2019-11-04 Between Freedom and Progress recovers and analyzes the global imaginings of Reconstruction s partisans those who struggled over and with Reconstruction as they vied with one another to define the nature of their country after the Civil War The remarkable technological and commercial transformations of the mid nineteenth century in particular steam engines telegraphs and an expanded commercial printing capacity created a constant stream of news description and storytelling from across and beyond the nation Reconstruction s partisans contended with each other to make sense of this information motivated by intense political antagonism combined with a shared but contested set of ideas about freedom and progress As writers lecturers editors travelers moral reformers racists abolitionists politicians suffragists soldiers and diplomats Reconstruction s partisans made competing claims about their place in the world Understanding how why and when they did so helps ground our understanding of Reconstruction itself a mysterious transatlantic term in its own intellectual context Three factors proved pivotal to the making of Reconstruction s world First from 1865 to the early 1870s the interconnected issues of how to remake the Union and how to remake the South exerted a powerful hold on federal politics defining the partisan landscape and inspiring rival arguments about what was possible and what was good The daunting nature of these issues created a

sense of crisis across the political spectrum with political discourse ranging in tone from combative to euphoric to apocalyptic Second though domestic in nature these issues were refracted through two broadly held beliefs that the causes of freedom and progress defined history and that distinctive peoples with their own characters composed the world's population These beliefs produced a disposition to think of developments from across and beyond the United States as essentially relatable to each other encouraging an intellectual style that favored wide ranging comparisons Third far from being confined to the elite this mode of thinking and arguing about the world lived and breathed in public texts that were produced and consumed on a weekly and daily basis This commercialized and politicized world of mass publishing was highly unequal in structure and content but it was also impressively vibrant and popular Together these three factors made the world of Reconstruction a global landscape of information argumentation and imagination that derived much of its vigor from domestic political battles

Books and Periodicals in Brazil 1768-1930 Ana Claudia Suriani Da Silva, 2017-07-05 Before the Portuguese Royal Court moved to its South American colony in 1808 books and periodicals had a very limited circulation there It was only when Brazilian ports were opened to foreign trade that the book trade began to flourish and printed matter became more easily available to readers whether for pleasure for instruction or for political reasons This book brings together a collection of original articles on the transnational relations between Brazil and Europe especially England and France in the domain of literature and print culture from its early stages to the end of the 1920s It covers the time when it was forbidden to print in Brazil and Portugal strictly controlled which books were sent to the colony through the quick flourishing of a transnational printing industry and book market after 1822 to the shift of hegemony in the printing business from foreign to Brazilian hands at the beginning of the twentieth century Sandra Guardini Vasconcelos is Professor of English and Comparative Literature at the University of Sao Paulo

Foundations of Modernity Isa Blumi, 2017-06-16 Innovatively looking at the complex interactions between indigenous peoples and modern imperialism in Arabia and Balkans Foundations of Modernity challenges previous analytical models that attempt to capture the complexity of human interactions during the 1800-1912 period in ways that instigates the paradigmatic shift of the Eurocentric perspective of modern world history

Age of Coexistence Ussama Makdisi, 2019-10-15 Flawless Makdisi reminds us of the critical declarations of secularism which existed in the history of the Middle East Robert Fisk The Independent Today's headlines paint the Middle East as a collection of war-torn countries and extremist groups consumed by sectarian rage Ussama Makdisi's Age of Coexistence reveals a hidden and hopeful story that counters this clichéd portrayal It shows how a region rich with ethnic and religious diversity created a modern culture of coexistence amid Ottoman reformation European colonialism and the emergence of nationalism Moving from the nineteenth century to the present this groundbreaking book explores without denial or equivocation the politics of pluralism during the Ottoman Empire and in the post-Ottoman Arab world Rather than judging the Arab world as a place of age-old sectarian animosities Age of Coexistence describes the forging of a complex

system of coexistence what Makdisi calls the ecumenical frame He argues that new forms of antisectarian politics and some of the most important examples of Muslim Christian political collaboration crystallized to make and define the modern Arab world Despite massive challenges and setbacks and despite the persistence of colonialism and authoritarianism this framework for coexistence has endured for nearly a century It is a reminder that religious diversity does not automatically lead to sectarianism Instead as Makdisi demonstrates people of different faiths but not necessarily of different political outlooks have consistently tried to build modern societies that transcend religious and sectarian differences **Final**

Solutions Sabby Sagall,2013-10-09 What causes genocide Through an examination of four modern genocides the Native Americans the Armenians the Jews and the Rwandan Tutsis Sabby Sagal formulates a theoretical framework for understanding some of the darkest hours of humanity Drawing on the scholarship of a range of Marxist psychoanalysts from the Frankfurt School to Wilhelm Reich shows how genocides are enacted by social classes or communities that have experienced isolation and denial of human needs prostration and humiliation at the hands of major historical defeats or powerlessness These denials or degradations produce severe reactions hatred destructiveness and an impotent rage which is often projected onto a perceived other Through close analysis and theorising of the commonalities and differences between recent genocides Sagal hopes to produce greater understanding of the socio psychological rationale behind atrocities in order to prevent recurrences **Leviathan 2.0** Charles S. Maier,2014-04-21 Thomas Hobbes laid the theoretical

groundwork of the nation state in Leviathan his tough minded treatise of 1651 Leviathan 2.0 updates this classic account to explain how modern statehood took shape between the mid nineteenth and mid twentieth centuries before it unraveled into the political uncertainty that persists today Modern states were far from immune to the modernizing forces of war technology and ideology From 1845 to 1880 the United States Canada Mexico and Argentina were all reconstituted through territorial violence Europe witnessed the unification of Germany and Italy while Asian nations such as Japan tried to mitigate foreign incursions through state building reforms A global wave of revolution at the turn of the century pushed the modernization process further in China Russia Iran and Ottoman Turkey By the late 1930s with the rise of the Soviet Union and Nazi Germany the momentum of history seemed to shift toward war glorifying totalitarian states But several variants of the modern state survived World War II the welfare states of Western democracies single party socialist governments and governments dominated by the military especially prevalent in Latin America Asia and the Middle East Toward the end of the twentieth century all of these forms stood in growing tension with the transformative influences of globalized capitalism Modern statehood recreated itself in many ways Charles S Maier concludes but finally had to adopt a precarious equilibrium with ever more powerful economic forces The Christian Minorities in Turkey Wilhelm Baum,2006 **Diasporic**
