Conversational Artificial Intelligence Romil Rawat,Rajesh Kumar Chakrawarti,Sanjaya Kumar Sarangi,Anand Rajavat,Mary Sowjanya Alamanda,Kotagiri Srividya,K. Sakthidasan Sankaran,2024-03-06 This book reviews present state of the art research related to the security of cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the academic world and industry allowing readers to understand the security concerns in advanced security solutions for conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and future research directions Conversational AI combines natural language processing NLP with traditional software like chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI assistants like Alexa become more popular Chatbots in the corporate world have advanced technical connections with clients thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised serious security concerns Threats are one time events such as malware and DDOS Distributed Denial of Service assaults Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to spam and advertise in chat rooms

by imitating human behavior and discussions or to trick individuals into disclosing personal information like bank account details

Man vs Big Data Stewart Cowley, 2017-10-19 Have you ever wondered how to beat the bookies How does your computer know you might like this song Should you be worried about this We can't answer that for you but Man vs Big Data does explore the numerous ways in which Big Data has sometimes imperceptibly infiltrated our lives Everything we do leaves a trail of data behind from buying something on a credit card to using a GPS enabled mobile phone whether you know it or not like it or not Big Data is now a part of modern life Heralded as the Fourth Industrial Revolution it is now more crucial than ever to learn about how data is affecting the way we live Man vs Big Data proves that this topic is one of the most important subjects facing us today and helps you get to grips with what that means for you *Handbook of Research on Digital Media and Advertising: User Generated Content Consumption* Eastin, Matthew S., Daugherty, Terry, Burns, Neal M., 2010-07-31 This book bridges the gap between professional and academic perceptions of advertising in new media environments defining the evolution of consumerism within the context of media change and establishing the practical issues related to consumer power shifts from supplier to user Provided by publisher c't Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots It explains why language models make mistakes and how they can be minimised This not only helps when you send questions and orders to one of the chatbots offered online If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI The c't editorial team explains where to find a suitable voice model how to host it locally and which service providers can host it The fact that generative AI is becoming increasingly productive harbours both opportunities and risks Suitable rules for the use of AI in schools training and at work help to exploit opportunities and minimise risks
