**The Power of Neurodiversity** Thomas Armstrong, 2025-07-29 From a bestselling author and psychologist an exploration and celebration of neurodivergence completely revised with the most up to date research and insights From ADHD and dyslexia to autism the number of diagnosis categories listed by the American Psychiatric Association has tripled in the last fifty years With so many people affected it is time to revisit our perceptions of people with disabilities Thomas Armstrong illuminates a new understanding of neuropsychological disorders He argues that if they are a part of the natural diversity of the human brain they cannot simply be defined as illnesses Armstrong explores the evolutionary advantages special skills and other positive dimensions of these conditions including autism ADHD dyslexia schizophrenia anxiety intellectual disabilities and mood disorders With an emphasis on positive niche construction for each area The Power of Neurodiversity is a manifesto as well as a keen look at disability as well as a must read for parents teachers and anyone who is looking to learn more about neurodivergence [Value-Based Engineering](#) Sarah Spiekermann, 2023-03-20 In times of powerful AI systems such as GPT Value based Engineering is deeply needed It is a new transdisciplinary IT innovation and engineering approach respecting human values and societal consequences of IT systems as these are planned and in early evolution stages The book tells the story of why we need technology for humanity more than ever before and what principles we should follow in building it More concretely it is a guide on how exactly companies should pursue their innovation efforts with an epilogue on how this is different from aspiring science fiction The Value based Engineering approach outlined in this book with concrete case studies forms and over 90 illustrations was developed and revised by over 100 experts from around the world engaged in a project called IEEE P7000 TM <https://www.valuebasedengineering.com> <https://www.youtube.com/channel/UCrLvHXQKvx17PbWaYJzEQQ> **Edtech for Multilingual Learners** Brent Warner, 2025 This friendly accessible book offers dozens of creative activities to help teachers use edtech tools to engage their students in the language learning process Many teachers of multilingual students could improve learning outcomes through the use of education technology

but don't have time for in-depth professional development that would help them in their work in this area. This book fills that gap offering guidance and inspiration to teachers of English as a Second or Other Language (ESOL) as well as to educators in other disciplines who work with multilingual learners. Organized by six key language acquisition skills: reading, writing, speaking, listening, vocabulary, and pronunciation, each chapter features eight to twelve activities to engage students and facilitate language learning. The activities are tech-driven yet flexible enough to adapt to the needs of different classroom settings. While some specific tools are discussed, the book shows teachers how to make the activities work with the technology they have available. The book includes links to ready-to-use slide decks for every activity. Offers a knowledgeable and thoughtful introduction to using AI with language learners. Features a backward design pedagogical approach in which each activity has an end goal in mind and is then developed to incorporate appropriate and effective tools. Is accompanied by the ELT Toolkit, a searchable online database of edtech tools for English language teachers hosted by TESOL International Association. Includes connections to the ISTE Standards in every chapter. Based on research-backed practices, this book's fun and practical approach will help busy teachers leverage technology to make the language learning process more fun and effective for their students. Audience: Secondary and higher ed TESOL educators and teachers working with ESL students.
