up to date and authoritative examination of the world's most radical technology neuroscientist and AI researcher Christopher Summerfield explores what it really takes to build a brain from scratch. We have entered a world in which disarmingly human-like chatbots such as ChatGPT, Claude, and Bard appear to be able to talk and reason like us and are beginning to transform everything we do. But can AI think, know, and understand? What are its values? Whose biases is it perpetuating? Can it lie, and if so, could we tell? Does their arrival threaten our very existence? These Strange New Minds charts the evolution of intelligent talking machines and provides us with the tools to understand how they work and how we can use them. Ultimately armed with an understanding of AI's mysterious inner workings, we can begin to grapple with the existential question of our age: have we written ourselves out of history, or is a technological utopia ahead?
