fundamental change in the way we work where we work how we work and the conditions of work The continued
advancements of smart technology and artificial intelligence globalisation and deregulation can provide a sleek view of the
world of work This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging
virtual and global workplace with 24 7 connectivity as the boundaries of the traditional organisation melt away Throughout
the developed world the notions of work and employment are becoming increasingly separated and for some this will provide

employment with less and less stable or secure work typified by the rise of the gig economy and creating more extreme work
in terms of working hours conditions and rewards These aspects of work are likely to have a significant negative impact on
the workforce in these environments These transformations are creating renewed interest in how work and the workforce is
