Contemporary Political Philosophy Will Kymlicka, 2001 **Explaining Libertarianism** J.C. Lester, 2014-11-30 Explaining Libertarianism four theses 1 Interpersonal liberty requires an explicit pre proprietarian purely factual theory 2 Liberty is and need only be morally desirable in systematic practice not in every logically possible case In practice there is no clash between the two main moral contenders rights and consequences 3 Nothing can ever justify support or ground any theory of liberty or its applications because it is logically impossible to transcend assumptions Theories can only be explained criticised and defended within conjectural frameworks 4 The state is inherently authoritarian and also negative sum It reduces welfare overall with the losses compounding over time Libertarian anarchic order is the positive sum solution to illiberal political chaos J C Lester is a philosopher of libertarianism He has written widely on the subject in books articles and dialogues His solution to the crucial philosophical problem of interpersonal liberty provides an explicit theory of liberty and explains how its application entails self ownership and external property and relates to all other interpersonal matters

Contemporary Political Philosophy an Anthology, 2015 *Children's Rights and Moral Parenting* Mark C. Vopat, 2015-02-10 Children's Rights and Moral Parenting offers systematic treatment of a variety of issues involving the intersection of the rights of children and the moral responsibility of parents Mark C Vopat offers a theory of the relationship between children parents and the state that can be applied to the real life decisions that parents are often in the position to make on behalf of their children In many instances our current view of parental rights has granted parents far more discretion than is morally warranted Vopat arrives at this conclusion by carefully considering the unique status children have socially legally and morally in most western societies Children's Rights and Moral Parenting is essentially contractualist in

the Rawlsian tradition While it may appear counterintuitive to speak of children in terms of the social contract tradition there is much this approach can do to provide some conceptual clarity to the nature of the relationship between children parents and the state The overarching theme of the book is the moral independence of children from extreme forms of parental and at times social control The objective of the book is to provide an argument for extending the range of things owed to children as well as making the case for fully including children in the moral community

Methods in Analytical Political Theory

Adrian Blau, 2017-05-02 This is the first book to explain how to use key methods in analytical political theory The methods discussed include contractualism reflective equilibrium positive political theory thought experiments and ideological analysis Many discussions of political theory methods describe and justify these methods with little or no discussion of their application emphasizing what is and why do over how to This book covers all three Each chapter explains what kinds of problems in political theory might require researchers to use a particular method the basic principles behind the method being proposed and an analysis of how to apply it including concrete principles of good practice The book thus summarizes methodological ideas grouped in one place and made accessible to students and it makes innovative contributions to research methods in analytical political theory

Group Rights as Human Rights

Neus Torbisco Casals, 2006-06-30 Liberal theories have long insisted that cultural diversity in democratic societies can be accommodated through classical liberal tools in particular through individual rights and they have often rejected the claims of cultural minorities for group rights as illiberal Group Rights as Human Rights argues that such a rejection is misguided Based on a thorough analysis of the concept of group rights it proposes to overcome the dominant dichotomy between individual human rights and collective group rights by recognizing that group rights also serve individual interests It also challenges the claim that group rights so understood

conflict with the liberal principle of neutrality on the contrary these rights help realize the neutrality ideal as they counter cultural biases that exist in Western states Group rights deserve to be classified as human rights because they respond to fundamental and morally important human interests Reading the theories of Will Kymlicka and Charles Taylor as complementary rather than opposed Group Rights as Human Rights sees group rights as anchored both in the value of cultural belonging for the development of individual autonomy and in each person's need for a recognition of her identity This double foundation has important consequences for the scope of group rights it highlights their potential not only in dealing with national minorities but also with immigrant groups and it allows to determine how far such rights should also benefit illiberal groups Participation not intervention should here be the guiding principle if group rights are to realize the liberal promise

Communitarianism and Its Critics Daniel A. Bell, 1993 Many have criticized liberalism for being too individualist but few have offered an alternative that goes beyond a vague affirmation of the need for community In this entertaining book written in dialogue form Daniel Bell fills this gap presenting and defending a distinctively communitarian theory against the objections of a liberal critic In a Paris cafe Anne a strong supporter of communitarian ideals and Philip her querulous critic debate the issues Drawing on the works of such thinkers as Charles Taylor Michael Sandel and Alasdair MacIntyre Anne attacks liberalism's individualistic view of the person by pointing to our social embeddedness She then develops Michael Walzer's idea that political thinking involves the interpretation of shared meanings emerging from the political life of a community and rebuts Philip's criticism that this approach damages her case by being conservative and relativistic She goes on to develop a justification of communal life and to answer the criticism that communitarians lack an alternative moral and political vision The book ends with two later discussions by Will Kymlicka and Daniel Bell in which Anne and another friend Louise argue about the merits of the book's earlier debate and put it in perspective Daniel Bell's book is a provocative defence of a distinctively communitarian theory which will stimulate interest and debate among both students of political theory and those approaching the subject for the first time The Journal of Philosophy, 1991

Canadian Philosophical Reviews, 1992 Reason Before Identity Amartya Sen, 1999 In November of 1998 Amartya Sen winner of the 1998 Nobel Prize for Economics delivered the 1998 Romanes Lecture before the University of Oxford The subject was social identity and its role and implications Selected Acquisitions Robert Crown Law Library, 1992

Dynamics Vs. Tradition in Chinese Foreign Policy Motivation Yin Qian, 1999 This book presents original evidence of a previously undisclosed dark side to China's Hong Kong policy after 1982 It documents a covert program of immigration from the mainland to Hong Kong which was designed to put in place a classic fifth column of Communist loyalists to be used if all other institution based arrangements for the power transfer of the British colony to Chinese rule failed This finding is revealing and important in its own right as a contribution to study of the Hong Kong transition But the book focuses more on the broader significance of the motivation of such a fifth column policy for both the study of Chinese foreign policy and

international relations theory Studies of international affairs regularly impute motives to states or their leaders Yet when it comes to analysis of the imputed motives most scholars see that as nearly impossible given the difficulty of penetrating the minds of the individual leaders concerned However a small number of scholars have taken up the challenge They believe that foreign policy motivation can be studied despite its apparent complexity and elusiveness They see the study of motivation of a given foreign policy as the only way of grasping its essence and therefore of ascertaining clues about its future development This book argues that motivation study advances our understanding of Chinese foreign policy Drawing on an investigation of existing theoretical studies of motivation it identifies and synthesises three approaches to the study of motivation that seem particularly relevant to the Chinese case perception personality and structural situational constraining factors It also analyses the historical political culture ideological and structural sources of Chinese policymaking to illustrate how these three elements can elucidate Chinese foreign policy motivation Its conclusion is then tested against the case of China's fifth column policy in Hong Kong The findings from the Hong Kong case study reflect two parallel but contradictory lines of motivation in the reform era of Deng Xiaoping a dynamic adjusting and learning process on the one hand and a strenuous effort to retain its traditional practice on the other The book concludes that despite increasing pressures for adaptation from constant and tremendous changes in global and national settings Chinese foreign policy motivation could not in the final analysis overcome the constraints imposed by its underlying doctrines and practices which had been so firmly embedded in the minds of the Communist leaders that it became a traditional mode of responding to the unknown and uncertain culture of Chinese foreign policy
