Continuum Companion To Research Methods In Applied Linguistics:

Continuum Companion to Research Methods in Applied Linguistics Brian Paltridge, Aek Phakiti, 2010-04-04 The Continuum Companion to Research Methods in Applied Linguistics is designed to be the essential one volume resource for students. The book includes qualitative and quantitative methods, research techniques and approaches, ethical considerations, sample studies, a glossary of key terms, resources for students. As well as covering a range of methodological issues, it looks at numerous areas in depth including researching gender and language, language and identity, pragmatics, vocabulary and grammar. Comprehensive and accessible, this will be the essential guide to research methods for undergraduate and postgraduate students in applied linguistics and language studies.

Continuum Companion to Research Methods in Applied Linguistics Brian Paltridge, Aek Phakiti, 2010

The Palgrave Handbook of Applied Linguistics Research Methodology Aek Phakiti, Peter De Costa, Luke Plonsky, Sue Starfield, 2018-11-19 This Handbook provides a comprehensive treatment of basic and more advanced research methodologies in applied linguistics and offers a state of the art review of methods particular to various domains within the field. Arranged thematically in 4 parts across 41 chapters, it covers a range of research approaches, presents current perspectives and addresses key issues in different research methods such as designing and implementing research instruments and techniques and analysing different types of applied linguistics data. Innovations, challenges and trends in applied linguistics research are examined throughout the Handbook. As such, it offers an up to date and highly accessible entry point into both established and emerging approaches that will offer fresh possibilities and perspectives as well as thorough consideration of best practices. This wide ranging volume will prove an invaluable resource to applied linguists at all levels, including scholars in related fields such as language learning and teaching, multilingualism, corpus linguistics, critical discourse analysis, discourse analysis and pragmatics, language assessment, language policy and planning, multimodal communication and translation.

Appraising Research in Second Language Learning Graeme Keith Porte, 2010 Designed for students of applied linguistics and second language acquisition, on research training courses, practising language teachers and those in training, this combination textbook/workbook is a set or recommended textbook on more than a hundred undergraduate and postgraduate courses worldwide. Now in its second edition, it remains the only book to provide specific advice and support to those wishing to learn a methodical approach to the critical analysis of a research paper. It seeks to answer a current need in the literature for a set of procedures that can be applied to the independent reading of quantitative research. Innovative features of the workbook include awareness raising, reading tasks and guided exercises to help develop and practise the critical skills required to appraise papers independently. Through informed and constructive appraisal of others' work, readers themselves are shown how to become more research literate, to discover new areas for investigation and to organise and present their own work more effectively for publication and peer evaluation. This revised second edition sees a closer integration of the text and workbook and a number of additions.

to the text itself as well as further guided and unguided research appraisal exercises *Experimental Research Methods in Language Learning* Aek Phakiti, 2014-12-18 Language learning research aims to describe and fully explain how and why language learning takes place but can fall short of its stated purpose Systematic rigorous research is needed if the growing field of language learning is to progress methodically This book demonstrates and fully explains such a methodology Given that research in language acquisition yields practical pedagogical implications it is crucial that it is rigorous and accurate This book offers a quantitative research methodology that relies on statistical analysis in order to make inferences and conclusions about language learning Experimental research aims to understand differences between or within groups of learners under manipulated environments It requires strict control of conditions enabling interpretations with a low factor of error Aek Phakiti provides step by step guidelines and underlying principles epistemology and methodology in a book that is essential for advanced students of language acquisition and language and education **The Routledge Handbook of**
