What is computer graphics and what are the conceptual tasks of research in this area To the average person the term still conveys more or less the design of gos and the manipulation of pictures with the help of image editing programs However during the past four decades computer graphics has evolved into an innovative multifaceted eld of research and computing that affects many other sciences In many areas and for many problems we can best convey an und standing through images that trigger our sense with the highest capability our eye And what is more aside from algorithms formulas and tables the c puter graphics scientist often is able to create beauty Though it is a beauty of its own it often fascinates the viewer especially when complex aesthetic images emerge from simple mathematical concepts Also there are only a few other areas that advance as dynamically as inf matics and especially computer graphics While CPU capacity still increases and is almost doubled every 18 months the rendering speed and ef ciency of graphics boards has increased even more during recent years Today images can be rendered in real time that some years ago still required several hours of computing Parallel to the rapid improvement of computer hardware many newalgorithms were developed that today form the basis for some fundamental changes and achievements in graphics Congress on Smart Computing Technologies Jagdish Chand Bansal, Harish Sharma, Antorweep Chakravorty, 2025-02-24 This book presents high quality research papers presented at Congress on Smart Computing Technologies CSCT 2023 organized by SAU Center for Research and Innovative Learning SCRIL South Asian University India from 2 3 December 2023 The book extensively covers recent research in algorithms for smart computing AI and machine learning in smart computing edge computing algorithms adversarial networks and autoencoders data visualization data mining data analytics machine learning game theory high performance computing mobile and ubiquitous platforms for smart environments cloud edge fog computing technologies for smart systems Internet of Things IoT and industrial IoT technologies for smart systems smart device and hardware security privacy and economics in smart environments big data healthcare informatics smart precision agriculture smart transportation social network analysis and human computer interaction The work is presented in two volumes Artificial Intelligence, Data Science and Applications Yousef Farhaoui, Amir Hussain, Tanzila Saba, Hamed Taherdoost, Anshul Verma, 2024-03-04 This book is to provide a comprehensive reference for professionals in the field of data science and applications artificial intelligence big data IoT and blockchain In summary this book is expected to function as a helpful resource and manual enabling readers to navigate the intricate domain of artificial intelligence the Internet of things IoT and blockchain in smart environments This book covers many topics related to integrating AI IoT blockchain and smart environments It begins by laying a solid foundation introducing each technology s fundamental concepts and principles Subsequent chapters explore applications and real world use cases demonstrating how AI IoT and blockchain can effectively address critical challenges within data science and applications Waterstone's Guide to Books, 1989 The British Journal of Photography, 2003 Artificial Intelligence-of-Things (AIoT) in Precision Agriculture Yaqoob Majeed, Longsheng Fu, Long He, 2024-02-12 The merging

of Artificial Intelligence AI and Internet of Things is known as Artificial Intelligence of Things AIoT IoT consists of interlinked computing devices and machines which can acquire transfer and execute field industrial operations without human involvement while AI processes the acquired data and helps extract the required information The technologies work in synergy AI enriches IoT through machine learning and deep learning based data analysis and learning capabilities whereas IoT enriches AI through data acquisition connectivity and data exchange Precision agriculture is becoming critically important for sustainable food production to meet the growing food demand In recent decades AI and IoT techniques have played an increasing role within industrial operations e g autonomous manufacturing automated supply chain management predictive maintenance smart energy grids smart home appliances and wearables however agricultural field operations are still heavily dependent on human labor This is because these operations are ill defined unstructured and susceptible to variation in natural conditions e g illumination landscape atmosphere plus the biological nature of crops fruits stems leaves and or shoots continuously change their shape and or color as they grow
