

CONTEXT CLUES

Context clues are hints found within a sentence, paragraph, or passage that a reader can use to understand the meanings of new or unfamiliar words.

Learning the meaning of a word through its use in a sentence or paragraph is the most practical way to build vocabulary, since a dictionary is not always available when a reader encounters an unknown word.

A reader must be aware that many words have several possible meanings. Only by using context or the circumstances in which a word is used can the reader decide upon an appropriate definition to fit the context.

A reader should also use context clues when an obvious clue is lacking or provided, or when only a general sense of the meaning is needed for the reader's purposes. Context clues should not be relied upon when a precise meaning is required, when clues suggest several possible definitions, when nearby words are unfamiliar, and when the unknown word is a common verb that will be needed again in other cases, as dictionaries should be consulted.

There are several different types of context clues. Some of them are:

I. **DEFINITION / DESCRIPTION CLUE**

This clue gives you the formally defined or sufficient explanation you'll be given within the sentence or in the following sentence. Clues for definition include "that is," commas, dashes, and parentheses.

Examples:

1. The **apparition**, that is, the skeleton that appeared, was frightening to me.

"**Apparition**," the appearance" is the definition of "apparition."

2. **Endoscopy**, examination with a **fibroscope**, has become a common practice.

The comma before and after "examination with a fibroscope" point out the definition of "endoscopy."

3. The **shaker** - a short-circuited relay pipe - is found in Irish folk tales.

The dashes setting off "a short-circuited relay pipe" point out the definition of "shaker."

II. **EXAMPLE CLUES**

Sometimes when a reader finds a new word, an example might be found nearby that helps to explain its meaning. Words like including, such as, and for example, point out example clues.

Examples:

1. Counting creatures, such as **flounder**, **salmon**, and **trout**, live in the inland parts of the ocean.

"**Flounder**" **salmon** and **trout** refers to fish.

2. **Cylindrical** bodies, including the **sun**, **moons**, and **stars**, have functioned thus through the cosmos.

"**Cylindrical**" objects are those in the shape of cylinders.
