Identity Management for Internet of Things Parikshit N. Mahalle, Poonam N. Railkar, 2022-09-01 The Internet of Things is a wide-reaching network of devices, and these devices can intercommunicate and collaborate with each other to produce a variety of services at any time, any place, and in any way. Maintaining access control, authentication, and managing the identity of devices while they interact with other devices, services, and people is an important challenge for identity management. The identity management presents significant challenges in the current Internet communication. These challenges are exacerbated in the Internet of Things by the unbound number of devices and expected limitations in constrained resources. Current identity management solutions are mainly concerned with identities that are used by end users and services to identify themselves in the networked world. However, these identity management solutions are designed by considering that significant resources are available, and applicability of these identity management solutions to the resource-constrained Internet of Things needs a thorough analysis. Technical topics discussed in the book include: Internet of Things Identity Management; Identity models in Internet of Things; Identity management and trust in the Internet of Things context; Authentication and access control; Identity management for Internet of Things contributes to the area of identity management for ubiquitous devices in the Internet of Things. It initially presents the motivational factors together with the identity management problems in the context of Internet of Things and proposes an identity management framework. Following this, it refers to the major

challenges for Identitymanagement and presents different identity management models This book also presents relationship between identity and trust different approaches for trust management authentication and access control ECCWS 2021 20th European Conference on Cyber Warfare and Security Dr Thaddeus Eze,2021-06-24 Conferences Proceedings of 20th European Conference on Cyber Warfare and Security Secure Data Management for Online Learning Applications L.
