

# CSI Pre-Algebra: Equations & Inequalities

Detectives,

The evil genius group, the Alchemagicians, have crossed the Atlantic and are terrorizing Europe. Indications are that they are behind a number of robberies across the continent and they are making progress in the construction of a world conquering device. Notes have been found at each site and have been signed "Justice Equilibrator". Through our intelligence we've determined this individual is a high ranking member of the group.

Once again we have received a cryptic text message and we've been told the result will calculate to Equilibrator's favorite number. Thus far there are six suspects that police have questioned. It is hoped that someone with a relatively strong number sense and spatial reasoning skills can crack some codes that have puzzled the detectives on the case so far.

Your job is to bring Justice Equilibrator to justice (um, yeah!) and save the planet. Since you are being brought in as a specialist you have to have definitive proof in order for an arrest to hold up in court. You need to be prepared to state your case and demonstrate your understanding of the following skills that Equilibrator is known to use in his notes.

- One-Step Equations and Inequalities
- Two-Step Equations
- Translating Equations
- Solving with Formulas

Be sure to include:

- Other examples of the concepts
- Definitions
- Any other relevant information

This is not a time to be sloppy. The slightest miscalculation or illogical footnote could result in a not guilty verdict.

Oh, did I mention that use of a calculator might prematurely set off his world conquering device? Good luck to you, gunshoe.

Chief Harris
