Richardson, Brad M. Jackson, 2025-10-21 Project management is truly an art seeking science with complex processes balancing project output objectives against restraints of time budget human resources quality and customer satisfaction Achieving this balance requires skill experience and a host of supporting tools and techniques Project Management Theory and Practice Fourth Edition explores the project delivery process through an examination of multiple strategies Its core material reflects the traditional model approach to the life cycle however it also highlights common usage errors and reality gaps This book describes the full life cycle of common

processes and tools every project manager needs to understand This fourth edition features a contemporary perspective on project management explores future needs and discusses new directions in the project management model This textbook introduces new processes and aims to address known gaps in current methodologies and outlines logical future directions Given the current success rates for projects a serious project manager must be prepared to make significant changes to the existing toolset and related processes This book aims to raise awareness of these needs and encourages examination of the shortcomings in current models This textbook emphasizes that beyond the theoretical aspects of project planning and control effective management is fundamentally a human activity While processes and tools serve as supports for human decision making they primarily help define the project s objectives and later aid decision makers in determining the execution plan This textbook emphasizes how to transform a project vision into a format that is suitable for execution It also emphasizes a life cycle perspective along with the essential mechanics needed to develop the projects The book s case study examples have been classroom evaluated with students and professionals to ensure they are effective and relevant

Microsoft Copilot Pro Step by Step Lisa Crosbie, 2024-12-20 Copilot Pro enables you to be more creative and productive but using generative AI requires a whole new way of thinking most users try once or twice get poor results and give up This book teaches them what they don t know and helps them get started with the right skills Copilot Pro adds generative AI experiences into the most used Microsoft applications Outlook Word PowerPoint Excel and OneNote enabling users to be more productive and creative by generating first drafts editing and improving their work easily understanding and finding pieces of information in large documents and gaining new insights It also allows users to generate text and images in a browser and via a mobile app using the latest AI models This is a completely new way of thinking and working like having your own personal enthusiastic intern working side by side with you every day to take on the mundane and time consuming tasks freeing you up for more interesting and creative work Generative AI has been everywhere in the media with a huge hype cycle but most everyday workers don t understand how it can be applied to their day to day work in a practical and transformative way This will follow the Step by Step series format taking the user through a series of steps they can follow to learn practical skills and understand what s possible The nature of generative AI is that the results vary every time so the book will provide several different examples of each skill to illustrate the variances and possibilities and help the reader find examples that are most relevant to them to build their understanding and knowledge Copilot Pro is designed for the consumer or home user and was only announced and made available in January 2024 The uptake of generative AI is more rapid than anything we have seen with any other technology with the free version of Copilot already having had 5 billion images created and 5 billion chats conducted as at the end of January 2024 both doubling quarter over quarter There is very little in Microsoft learning resources available yet on Copilot and there is a huge demand for learning in this space People don t know what they don t know and need help with the new way of thinking required to use this technology in practical and effective everyday ways
