The book highlights the role of culture, politics, and legal issues in international business and illustrates how they influence institutions, structures, and processes that permeate all functions of business. This is the only international business textbook that offers dedicated discussion of small and mid-size international firms where many students are likely to be employed, in addition to large multinational enterprises. It is also the only text to offer chapters on corruption, e-commerce, and international entrepreneurship. The book offers a highly integrated and action-focused approach to the field that helps the reader make explicit connections across concepts and functions, develops the skill to address various IB issues and problems, and most importantly, broadens understanding of the global business environment and its repercussions for executives. In addition to superior internal integration of the various issues discussed in the book, for example, this may be the only IB text where the chapter on finance and accounting has specific references to culture and how it affects those functions; the book provides easy-to-understand links to functional business areas, thus enabling better integration within the BA or MBA business curriculum. This book is suitable for both undergraduate and graduate business students taking such courses as international business, international management, global business, global business strategy, multinational management, foreign direct
