observed as an adequate approach for assisting teachers of a second language with learning materials In this paper we set a goal to compare contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour We will consider several researches on avoidance behaviour and will show that contrastive analysis does predict the avoidance phenomenon in most cases and therefore gives a complete description of the areas of difficulty for learners of a second language We suppose that we can come across the cases in which the avoidance phenomenon would not manifest itself although it has been predicted by contr
