**The Participator in Contemporary Art** Kaija Kaitavuori, 2018-08-30 The early 21st century has seen contemporary art make continued use of audience participation in which the spectator becomes part of the artwork itself In this book Kaija Kaitavuori claims that the participator is a new artistic role that does not fall under the auspices of artist or spectator and in proving such she devises a four group typology of involvement Her classification distinguishes between different forms of engagement and identifies their specific features The key criteria she proposes are how concepts of authorship and ownership shift in relation to collectively created work how contracts regulating the use and production of shared work are arranged and the extent to which involvement in making art can be regarded as democratic This highly original book thus offers students and teachers the tools with which to improve their understanding of participatory art and removes the confusing terminology that has characterized so many other discussions

**On the Style Site** Ina Blom, 2007 This book takes its cue from a simple observation During the last 30 years or so the term style has all but disappeared from art critical or art historical terminology For new art history it was an increasingly problematic term associated with the taxonomist and historicist concerns of old art history not to speak of its fixation on the figure of the great artist For contemporary art criticism the term seemed simply irrelevant Faced with artistic activities that challenged traditional ideas of the work of art and its relation to aesthetics itself new critical paradigms had to be invented As interventions in social reality an art of actions and events replaced preoccupations with visual style and shape the politics of social sites replaced the language of forms But while style has all but disappeared from art historical and art critical discourse artistic practice since the 1960s onwards has seemed increasingly focused on the stylistics of the life environment the way in which everyday life itself is formed designed or stylized This development calls for a new reading of the relationship between art and the question of style one that approaches the question of style itself not just as an art historical tool or method of explanation but as a social site in which relations between appearance recognition and social identity is negotiated The question or crisis of the contemporary style site is related to the significance of stylistic issues in contemporary politics and economics that capitalizes on life itself and that is perhaps best understood through its particular production of subjectivity The works discussed in this book treat style as precisely such a site and should therefore be discussed in extension of what is generally known as site specific practices in art However the style site works radically change the notion of the politics of this type of

art and may in the end also contribute to open the question of the life art practices of the avant garde to new interpretations
