Creating a Docking Palette for AutoCAD® with VB.NET

Mike Tuenney – Ohio Gratings, Inc.

CP205-2

This is a VB.NET translation of the C# example that ships with the ObjectARX SDK. This class demonstrates how to create a simple palette inside a dockable window within AutoCAD that contains the contents of a .NET user control created in VB.NET. Other functionality demonstrated includes docking states and associated reader events, drag-and-drop from the Tool Palette window, and activating different Tool Palettes within the Tool Palette set. This is a must-have user-interface option in every developer's arsenal.
