Buckminster Fuller, 1982-02-15 R Buckminster Fuller is regarded as one of the most important figures of the 20th century renowned for his achievements as an inventor designer architect philosopher mathematician and dogged individualist Perhaps best remembered for the Geodesic Dome and the term Spaceship Earth his work and his writings have had a profound impact on modern life and thought *Critical Path* is Fuller s master work the summing up of a lifetime s thought and concern as urgent and relevant as it was upon its first publication in 1981 *Critical Path* details how humanity found itself in its current situation at the limits of the planet s natural resources and facing political economic environmental and ethical crises The crowning achievement of an extraordinary career *Critical Path* offers the reader the excitement of understanding the essential dilemmas of our time and how responsible citizens can rise to meet this ultimate challenge to our future *Cosmography* R. Buckminster Fuller, 1992 Explains the concept of synergetics and its relationship with politics and history to illustrate the crucial link between humanity and nature *Georges Bataille and Contemporary Thought* Will Stronge, 2017-10-19 Georges Bataille s influence upon 20th century philosophy is hard to overstate His writing has transfixed his readers for decades exerting a powerful influence upon Foucault Blanchot and Derrida amongst many others Today Bataille continues to be an important reference for many of today s leading theorists such as Giorgio Agamben Roberto Esposito Jean Luc Nancy and Adrianna Caverero His work is a unique and enigmatic combination of mystical phenomenology politics anthropology and economic theory sometimes adopting the form of literature sometimes that of ontology This is the first book to take Bataille s ambitious and unfinished *Accursed Share* project as its thematic guide with individual contributors isolating themes concepts or sections from within the three volumes and taking them in different directions Therefore as well as providing readings of Bataille s key concepts such as animality sovereignty catastrophe and the sacred this collection aims to explore new terrain and new theoretical problems *Georges Bataille and Contemporary Thought* acts simultaneously as a companion to Bataille s three volume *secular theodicy* and as a laboratory for new syntheses within his thought **The Experience Machine** Gloria Sutton, 2015-02-20 An argument that the collaborative multimedia projects produced by Stan VanDerBeek in the 1960s and 1970s anticipate contemporary new media and participatory art practices In 1965 the experimental filmmaker Stan VanDerBeek 1927 1984 unveiled his *Movie Drome* made from the repurposed top of a grain silo VanDerBeek envisioned *Movie Drome* as the prototype for a communications system a global network of *Movie Dromes* linked to orbiting satellites that would store and transmit images With networked two way communication *Movie Dromes* were meant to ameliorate technology s alienating impulse In *The Experience Machine* Gloria Sutton views VanDerBeek known mostly for his experimental animated films as a visual artist committed to the radical aesthetic sensibilities he developed during his studies

at Black Mountain College She argues that VanDerBeek's collaborative multimedia projects of the 1960s and 1970s sometimes characterized as Expanded Cinema with their emphases on transparency of process and audience engagement anticipate contemporary art's new media installation and participatory practices VanDerBeek saw Movie Drome not as pure cinema but as a communication tool an experience machine In her close reading of the work Sutton argues that Movie Drome can be understood as a programmable interface She describes the immersive experience of Movie Drome which emphasized multi sensory experience over the visual display strategies deployed in the work the Poemfield computer generated short films and VanDerBeek's interest unique for the time in telecommunications and computer processing as a future model for art production Sutton argues that visual art as a direct form of communication is a feedback mechanism which turns on a set of relations not a technology
