Literature in Translation Carol Maier, Françoise Massardier-Kenney, 2010 In the last several decades literary works from around the world have made their way onto the reading lists of American university and college courses in an increasingly wide variety of disciplines This is a cause for rejoicing Through works in translation students in our mostly monolingual society are at last becoming acquainted with the multilingual and multicultural world in which they will live and work Many instructors have expanded their reach to teach texts that originate from across the globe Unfortunately literature in English translation is frequently taught as if it had been written in English and students are not made familiar with the cultural linguistic and literary context in which that literature was produced As a result they submit what they read to their own cultural expectations they do not read in translation and do not reap the benefits of intercultural communication Here a true challenge arises for an instructor Books in translation seldom contain introductory information about the mediation that translation implies or the stakes involved in the transfer of cultural information Instructors are often left to find their own material about the author or the culture of the source text Lacking the appropriate pedagogical tools they struggle to provide information about either the original work or about translation itself and they might feel uneasy about teaching material for which they lack adequate preparation Consequently they restrict themselves to well known works in translation or works from other countries originally written in English Literature in Translation Teaching Issues and Reading Practices squarely addresses this pedagogical lack The book s sixteen essays provide for instructors a context in which to teach works from a variety of languages and cultures in ways that highlight the effects of linguistic and cultural transfers **New Insights into Arabic Translation and Interpreting** Mustapha Taibi, 2016-04-14 This book addresses translation and interpreting with Arabic either as a source or target language It focuses on new fields of study and professional practice such as community translation and interpreting and offers fresh insights into the relationship between culture translation and interpreting Chapters discuss issues relating specifically to Arabic and the Arab cultural context and contribute views research findings

and applications that come from a language combination and a cultural background quite different from traditional Eurocentric theoretical and professional positions This volume is a significant addition to resources on Arabic translation and interpreting and contributes fresh perspectives to translation studies in general It is of interest to students researchers and professionals working in public service community legal administrative and healthcare translation and interpreting as well as intercultural communication and translator education *Language Problems & Language Planning* ,2005

Anderman,Margaret Rogers,2008 The emergence of studies of translation based on electronic corpora has been one of the most interesting and fruitful developments in Translation Studies in recent years But the origins of such studies can be traced back through many decades as this volume sets out to establish Covering a number of European languages including Czech Hungarian Polish and Slovenian as well as French Spanish Portuguese and Swedish the book presents many new studies of translation patterns using parallel corpora focusing on particular linguistic features The studies reveal systemic differences which are in turn of relevance to the linguistic description of the languages concerned as well as to translator training Also included are broader ranging contributions on the concept of translation universals including a critical perspective on this popular topic 127 words
