**Quantum Cultural Intelligence and Managerial Problem Solving** Gebhard Deissler, 2011-04-01 Scientific Study from the year 2011 in the subject Cultural Studies Basics and Definitions course Intercultural Research language English abstract The quantum metaphorical conceptualization of the world is derived from Heisenberg's uncertainty principle and Bohr's complementarity principle formulated in the first half of the past century Both refer to the subatomic world and the understanding of matter and energy The first postulates that one cannot determine the position and the momentum of a subatomic particle simultaneously While one can be determined the other eludes and vice versa The second is referred to as the wave particle duality It implies that matter and energy have two complementary aspects i.e. particles or waves Whether we consider God and man made in his likeness or the double helix of the DNA with its two strands or the millennia old Chinese yin yang principle everywhere we find complementary realities that can more fully explain life physical biological metaphysical philosophical etc

**Cultural Intelligence as Driver of Team Performance?**

**An Empirical Investigation** Aliza Dansch, 2020-12-14 Master's Thesis from the year 2019 in the subject Psychology Work Business Organisation grade 1.3 University of Flensburg Internationales Institut für Management und ökonomische Bildung language English abstract This study is among the first which identified a relationship between CQ and team performance in a business setting including a moderating role of virtuality. These findings serve to demonstrate that team performance can be enhanced through intercultural trainings corresponding to different factors of CQ which hence serve as a possible starting point for improved international cooperation. The trend of technological development and increasing competition within the global economy requires more profound answers to the question of why some people are more effective in intercultural environments than others. Therefore research about cultural intelligence CQ defined as the ability to cope in intercultural settings has received increasing attention for the last years. The multidimensional construct of CQ introduced in 2003 by Earley and Ang analyses CQ from four different angles. Metacognitive CQ focuses on the awareness of other cultures while cognitive CQ revolves around adaptive cultural standards. Motivational CQ addresses the interest in meeting other cultures. Finally behavioral CQ refers to the intuitive behavior of people within intercultural interactions. To tighten the gap of knowledge within this field of research this study is aimed at elucidating the relation between the single factors of CQ and team performance measured on three indicators. Moreover the moderating effect of virtuality and team identification on this relation should be examined since international teams are often characterized by a virtual communication and less cohesion. This should give further insights on how to correctly cope with the increasing local flexibility in the business environment.

Cultural Intelligence (EasyRead Super Large 20pt Edition) , *Cultural Intelligence in the World of Work* Yuan Liao, David C. Thomas, 2020-01-28 This book provides a comprehensive review of both the theoretical development and empirical study of the concept of cultural intelligence. A review of previous work on cross cultural competence provides an historical backdrop against which the two main theories of cultural intelligence are presented. These two approaches as well as the assessments derived from them are compared and evaluated. Issues associated with the measurement of cultural intelligence are examined in detail. An important feature of the review of the empirical work on cultural intelligence is that

results are discussed in terms of the relationship of the four sub dimensions of the Cultural Intelligence Scale CQS and also that results using the Short Form Cultural Intelligence Scale SFCQ and other measures of the concept are included The review of empirical work includes studies that cast cultural intelligence as an antecedent as a dependent variable and as a moderator and a mediator Cultural intelligence at the group and organizational levels are also discussed Finally this review sets the stage for a discussion of appropriate future directions in the study of cultural intelligence Scholars in organizational psychology interested in the concept of cultural intelligence will find this an essential guide Cultural intelligence and its relationship with key project manager competencies Kurt A.
