W. Wolters, 1999 A new edition of this classic study of mandala Southeast Asia The revised book includes a substantial retrospective postscript examining contemporary scholarship that has contributed to the understanding of Southeast Asian history since 1982 Cultural Heritage and Contemporary Change, **Cultural Heritage and Contemporary Change**, 19?? *Material Culture and Asian Religions* Benjamin J. Fleming, Richard Mann, 2014 Traditionally research on the history of Asian religions has been marked by a bias for literary evidence privileging canonical texts penned in classical languages Not only has a focus on literary evidence shaped the dominant narratives about the religious histories of Asia in both scholarship and popular culture but it has contributed to the tendency to study different religious traditions in relative isolation from one another Today moreover historical work is often based on modern textual editions and increasingly on electronic databases What may be lost in the process is the visceral sense of the text as artifact as a material object that formed part of a broader material culture in which the boundaries between religious traditions were sometimes more fluid than canonical literature might suggest This volume brings together specialists in a variety of Asian cultures to discuss the methodological challenges involved in integrating material evidence for the reconstruction of the religious histories of South Southeast Central and East Asia By means of specific test cases the volume explores the importance of considering material and literary evidence in concert What untold stories do these sources help us to recover How might they push us to reevaluate historical narratives traditionally told from literary sources By addressing these questions from the perspectives of different subfields and religious traditions contributors map out the challenges involved in interpreting different types of data assessing the problems of interpretation distinct to specific types of material evidence e g coins temple art manuscripts donative inscriptions and considering the issues raised by the different patterns in the preservation of such evidence in different locales Special attention is paid to newly discovered and neglected sources to our evidence for trade migration and inter regional cultural exchange and to geographical locales that served as contact zones

connecting cultures In addition the chapters in this volume represent the rich range of religious traditions across Asia including Hinduism Buddhism Taoism Shinto and Chinese religions as well as Islam and eastern Christianities **Religion and Violence in South Asia** John Hinnells,Richard King,2007-01-24 Do religions justify and cause violence or are they more appropriately seen as forces for peace and tolerance Featuring contributions from international experts in the field this book explores the debate that has emerged in the context of secular modernity about whether religion is a primary cause of social division conflict and war or whether this is simply a distortion of the true significance of religion and that if properly followed it promotes peace harmony goodwill and social cohesion Focusing on how this debate is played out in the South Asian context the book engages with issues relating to religion and violence in both its classical and contemporary formations The collection is designed to look beyond the stereotypical images and idealized portrayals of the peaceful South Asian religious traditions especially Hindu Buddhist Jain and Sufi which can occlude their own violent histories and to analyze the diverse attitudes towards and manifestations of violence within the major religious traditions of South Asia Divided into three sections the book also discusses globalization and the theoretical issues that inform contemporary discussions of the relationship between religion and violence *Cultural heritage and contemporary change. Religion and Public Culture Keith E. Yandell
Keith E. Yandell, John J. Paul, 2013-11-19 The last two centuries have witnessed profound changes in the nature of public consciousness Nowhere has this been more true than in India especially in relation to changing cultures of public life and religious tradition in South India Essays in this collection attempt to explore the intricacies of what is perhaps the single most complex socio religious environment in the world The essays consider the evolution of the notion of Hinduism as a distinct and singular separate religion the relationship between this kind of formulation and various European or western influences in India and differences which the formation of this idea and its acceptance have made upon wider public consciousness Each essay also considers certain general issues such as the passing along of religious authority from one generation to the next and the rise of disputes over matters both ideological or doctrinal and institutional disputes that are fundamental to the traditions concerned and yet have unmistakable cross cultural references

Inside Southeast Asia Niels Mulder, 1996 Written for both interested laymen and specialists this book explores how modern urban Southeast Asians view and manage their social life By comparing the ways they live with their religious representations with intimate and more distant others and with their rapidly changing environment the author demonstrates the marked similarities in the perception of individual and society in three civilizations along the inner littoral of Southeast Asia irrespective of the great religious diversity that appears to characterize the region at first glance
