Corporate Entrepreneurship And Innovation Edition:

Corporate Entrepreneurship and Innovation Paul Burns, 2020-02-28 Written by a highly regarded expert on entrepreneurship this bestselling textbook provides an engaging and comprehensive overview of corporate entrepreneurship. Now in its fourth edition and fully revised throughout this accessible text is structured in four key parts that cover everything a student needs to know about the topic. After an initial consideration of what constitutes corporate entrepreneurship and innovation the author then guides students through the four pillars of entrepreneurial architecture: culture, structure, leadership, and strategy. The third section focusses on the entrepreneurial mind set including how to encourage creativity, business ideas, and developing concepts. Finally the book draws attention to corporate venturing, examining venture teams, intrapreneurs, market development, and the role of shareholder value. It is no longer sufficient for businesses to grow simply by cutting costs and taking over competitors. To achieve true success organisations must avoid an ageing product or service portfolio, to bring new innovative ideas to market. Corporate entrepreneurship is inherently risky and therefore requires a fresh approach to strategy. The approach Paul Burns offers will successfully overcome barriers to launching new ideas, internal challenges of managing creativity, and show how to foster an entrepreneurial culture. This is the go to textbook for all students studying Corporate Entrepreneurship, Intrapreneurship or Corporate Venturing at undergraduate, postgraduate or MBA level. The book is also essential reading for courses on Strategic Entrepreneurship and Innovation. New to this Edition: Fully revised and updated content throughout with new four part structure. Brand new case studies in every chapter featuring some of the world's highest profile companies from across the globe. A greater focus on innovation including a new chapter on this topic at the start of the book. New chapters on Developing a Business Model, Managing Change, and Managing Risk. New on page glossary with key terms highlighted in the text and defined in the margins. New Activities and Group Discussion topics at the end of each chapter.

Entrepreneurship, Innovation and Sustainability Marcus Wagner, 2017-09-08 This book addresses the intersection of entrepreneurship, innovation, and sustainability (EIS), presenting high-quality research illuminating the relationship between the three fields. The EIS nexus is particularly relevant from a European point of view given the focus of the European Commission on corporate social responsibility (CSR) and sustainability, as well as their prominent role within the European Union in general. Also, the rapid economic growth witnessed especially in the BRIC countries in recent years requires that firms reconcile sustainability aspects with profitability and innovation, and entrepreneurs are seen as key diffusers of these aims. Sustainability requires both radical and incremental innovation at many different levels: technology, product, process, system. In many cases, such innovations come from small and medium-sized enterprises, and so the role of the entrepreneur is key to their success. The book is split into six sections. The first section examines the nexus in detail, focusing on system-oriented connectivity between sustainability, innovation, and entrepreneurship. The second section looks at how to nurture corporate entrepreneurship for sustainability, and the third considers mature industries such as automotive, chemicals, and electronics and how sustainability aspects can be integrated into innovation process and strategy. The fourth section examines the nexus through the lens of developing countries in Africa. Sustainable entrepreneurship is identified as a hugely beneficial way to foster development. The fifth section of the book concentrates on SMEs, and finally, the EIS nexus is approached from a network perspective and focuses on inter-organisational partnerships, which are often an important facilitator or spark for EIS initiatives. This book will prove to be essential for researchers in the EIS nexus and be of invaluable help to practitioners, governments, and inter-governmental bodies attempting to encourage sustainable entrepreneurship and innovation.
