EU Policy and Legal Framework for Artificial Intelligence, Robotics and Related Technologies - The AI Act Nikos Th. Nikolinakos,2023-07-06 Artificial Intelligence AI can benefit our society and economy but also brings with it new challenges and raises legal and ethical questions According to the author

of this comprehensive analysis it is imperative to ensure that AI is developed and applied in an appropriate legal and regulatory framework that promotes innovation and investment and at the same time addresses the risks associated with certain uses of AI related technologies Essential to understanding the relationship between policy and law this book traces the evolution of EU policy on artificial intelligence and robotics focusing in particular on the EU's ethical framework for AI which defines trust as a prerequisite for ensuring a human centric approach The main part of the book provides a thorough and systematic analysis of the Commission's 2021 proposed AI Act which establishes harmonised rules for the development placement on the market and use of AI systems in the EU The author painstakingly compares the Commission's proposed AI Act with the numerous compromise proposals of the Council of the European Union leading to the final version of the Council's AI Act general approach and its formal adoption on 6 December 2022 The author also examines with extraordinary detail the amendments proposed by the relevant committees and political groups of the European Parliament revealing the position the Parliament is likely to adopt in the forthcoming negotiations with the Commission and the Council on the text of the AI Act Numerous legislative and policy documents are presented in detail while the analysis also considers the comments made by all interested parties e.g. the European Commission Council of the European Union European Parliament governmental organisations national competent authorities and stakeholders actors with different conflicting interests such as corporations business and consumer associations civil society and other non profit organisations In the course of its in depth analysis this book will provide readers with crucial insight into the reasons behind the European Institutions different approaches and the often contradictory interests of stakeholders Because the policy arguments are carefully balanced and drafted with scrupulous care this volume will establish itself as a reference resource to be consulted for years to come **EU**

Healthcare Sector Organization, Management and Payment Systems Handbook Volume 1 Strategic Information, Programs and Regulations IBP, Inc., 2014-12-04 Finland Healthcare Sector Organization Management and Payment Systems Handbook Strategic Information Programs and Regulations *MEDINFO 2015: eHealth-enabled Health* Andrew Georgiou, Paulo Mazzoncini de Azevedo Marques, 2015-09-15 Health and Biomedical Informatics is a rapidly evolving multidisciplinary field one in which new developments may prove crucial in meeting the challenge of providing cost effective patient centered healthcare worldwide This book presents the proceedings of MEDINFO 2015 held in S o Paulo Brazil in August 2015 The theme of this conference is eHealth enabled Health and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications integration and evaluation of eHealth systems and solutions Included here are 178 full papers and 248 poster abstracts selected after a rigorous review process from nearly 800 submissions by 2 500 authors from 59 countries The conference brings together researchers clinicians technologists and managers from all over the world to share their experiences on the use of information methods systems and technologies to promote patient centered care improving patient safety enhancing care outcomes facilitating

translational research and enabling precision medicine as well as advancing education and skills in Health and Biomedical Informatics This comprehensive overview of Health and Biomedical Informatics will be of interest to all those involved in designing commissioning and providing healthcare wherever they may be *Health Data Pools Under European Data Protection and Competition Law* Giulia Schneider,2022-04-13 This book explores the emerging economic reality of health data pools from the perspective of European Union policy and law The contractual sharing of health data for research purposes is giving rise to a free movement of research data which is strongly encouraged at European policy level within the Digital Single Market Strategy However it has also a strong impact on data subjects fundamental right to data protection and smaller businesses and research entities ability to carry out research and compete in innovation markets Accordingly the work questions under which conditions health data sharing is lawful under European data protection and competition law For these purposes the work addresses the following sub questions i which is the emerging innovation paradigm in digital health research ii how are health data pools addressed at European policy level iii do European data protection and competition law promote health data driven innovation objectives and how iv which are the limits posed by the two frameworks to the free pooling of health data The underlying assumption of the work is that both branches of European Union law are key regulatory tools for the creation of a common European health data space as envisaged in the Commissions 2020 European strategy for data It thus demonstrates that both European data protection law as defined under the General Data Protection Regulation and European competition law and policy set research enabling regimes regarding health data provided specific normative conditions are met From a further perspective both regulatory frameworks place external limits to the freedom to share or not share research valuable data
