psychology and profiling as a blend of psychic visions supernatural intuition and evidence analysis The reality however is quite different Using true crime case studies from history and the present examples from current and former FBI profilers and informative sidebars Criminal Psychology Personality Profiling explores the many roles and responsibilities criminal psychologists and profilers fill as they support other professionals in addressing crime and its consequences From crime scene analysis to offering expert testimony in court these behavioral scientists offer an understanding of crime the criminal mind and those affected by crime *Criminal Psychology, A Manual for Judges, Practitioners, and Students* Hans Gross, 2022-06-10 Excerpt Socrates dealing in the Meno with the teachability of virtue sends for one of Meno's slaves to prove by him the possibility of absolutely certain a priori knowledge The slave is to determine the length of a rectangle the contents of which is twice that of one measuring two feet but he is to have no previous knowledge of the matter and is not to be directly coached by Socrates He is to discover the answer for himself Actually the slave first gives out an incorrect answer He answers that the length of a rectangle having twice the area of the one mentioned is four feet thinking that the length doubles with the area Thereupon Socrates triumphantly points out to Meno that the slave does as a matter of fact not yet quite know the truth under consideration but that he really thinks he knows it and then Socrates in his own Socratic way leads the slave to the correct solution This very significant procedure of the philosopher is cited by Guggenheim as an illustration of the essence of a priori knowledge and when we properly consider what we have to do with a witness who has to relate any fact we may see in the Socratic method the simplest example of our task We must never forget that the majority of mankind dealing with any subject whatever always believe that they know and repeat the truth and even when they say doubtfully I believe It seems to me there is in this tentativeness more meant than meets the ear When anybody says I believe that it merely means that he intends to insure himself against the event of being contradicted by better informed persons but he certainly has not the doubt his expression indicates When however the report of some bare fact is in question It rained It was 9 o'clock His beard was brown or It was 8 o'clock it does not matter to the narrator and if he imparts such facts with the introduction I believe then he was really uncertain The matter becomes important only where the issue involves partly concealed observations conclusions and judgments In such cases another factor enters conceit what the witness asserts he is fairly certain of just because he asserts it and all the I believes Perhapses and It seemed are merely insurance against all accidents **Crime And Behaviour: An Introduction To Criminal And Forensic Psychology** Majeed
