Advances in Cross-Language Information Retrieval Martin Braschler,Julio Gonzalo,Martin Kluck,2003-11-17 This book presents the thoroughly refereed post proceedings of a workshop by the Cross Language Evaluation Forum Campaign CLEF 2002 held in Rome Italy in September 2002 The 43 revised full papers presented together with an introduction and run data in an appendix were carefully reviewed and revised upon presentation at the workshop The papers are organized in topical sections on systems evaluation experiments cross language and more monolingual experiments mainly domain specific information retrieval interactive issues cross language spoken document retrieval and cross language evaluation issues and initiatives Cross-Language Information Retrieval and Evaluation Cross-Language Evaluation Forum.

Workshop,Carol Peters,2001-08-29 This book presents the thoroughly refereed post proceedings of the international Cross Language Evaluation Forum Workshop organized by the CLEF activity of the European DELOS Network of Excellence for Digital Libraries The 25 revised papers presented together with an introduction were carefully selected based on two rounds of reviewing All current aspects of cross language information retrieval are addressed ranging from foundational issues and systems evaluation to applications in a variety of fields **Information Retrieval Evaluation in a Changing World**

Nicola Ferro,Carol Peters,2019-08-13 This volume celebrates the twentieth anniversary of CLEF the Cross Language Evaluation Forum for the first ten years and the Conference and Labs of the Evaluation Forum since and traces its evolution over these first two decades CLEF s main mission is to promote research innovation and development of information retrieval IR systems by anticipating trends in information management in order to stimulate advances in the field of IR system experimentation and evaluation The book is divided into six parts Parts I and II provide background and context with the first part explaining what is meant by experimental evaluation and the underlying theory and describing how this has been interpreted in CLEF and in other internationally recognized evaluation initiatives Part II presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in CLEF and elsewhere Parts III IV and V represent the core of the book presenting some of the most significant evaluation activities in CLEF ranging from the early multilingual text processing exercises to the later more sophisticated experiments on multimodal collections in diverse genres and media In all cases the focus is not only on describing what has been achieved but above all on what has been learnt The final part examines the impact CLEF has had on the research world and discusses current and future challenges both academic and industrial including the relevance of IR benchmarking in industrial settings Mainly intended for researchers in academia and industry it also offers useful insights and tips for practitioners in industry working on the evaluation and performance issues of IR tools and graduate students specializing in information retrieval

Müller,Paul Clough,Thomas Deselaers,Barbara Caputo,2010-08-20 The pervasive creation and consumption of content especially visual content is ingrained into our modern world We are constantly consuming visual media content in printed form and in digital form in work and in leisure pursuits Like our cave man forefathers we use pictures to record things which are of importance to us as memory cues for the future but nowadays we also use pictures and images to document processes we use them in engineering in art in science in medicine in entertainment and we also use images in advertising Moreover when images are in digital format either scanned from an analogue format or more often than not born digital we can use the power of our computing and networking to exploit images to great effect Most of the technical problems associated with creating compressing storing transmitting rendering and protecting image data are already solved We use accepted standards and have tremendous infrastructure and the only outstanding challenges apart from managing the scale issues associated with growth are to do with locating images That involves analysing them to determine their content classifying them into related groupings and searching for images To overcome these challenges we currently rely on image metadata the description of the images they captured automatically at creation time or manually added afterwards

Evaluation of Cross-Language Information Retrieval Systems Martin Braschler,Julio Gonzalo,Michael Kluck,2003-08-02 The second evaluation campaign of the Cross Language Evaluation Forum CLEF for European languages was held from January to September 2001 This campaign proved a great success and showed an increase in participation of around 70% compared with CLEF 2000 It culminated in a two day workshop in Darmstadt Germany 3-4 September in conjunction with the 5th European Conference on Digital Libraries ECDL 2001 On the first day of the workshop the results of the CLEF 2001 evaluation campaign were reported and discussed in paper and poster sessions The second day focused on the current needs of cross language systems and how evaluation campaigns in the future can best be designed to stimulate progress The workshop was attended by nearly 50 researchers and system developers from both academia and industry It provided an important opportunity for researchers working in the same area to get together and exchange ideas and experiences Copies of all the presentations are available on the CLEF web site at <http://www.clef-campaign.org> This volume contains thoroughly revised and expanded versions of the papers presented at the workshop and provides an exhaustive record of the CLEF 2001 campaign CLEF 2001 was conducted as an activity of the DELOS Network of Excellence for Digital Libraries funded by the EC Information Society Technologies program to further research in digital library technologies The activity was organized in collaboration with the US National Institute of Standards and Technology NIST

Advances in Multilingual and Multimodal Information Retrieval Valentin Jijkoun, Thomas Mandl, Henning Müller, Douglas W. Oard, Vivien Petras, Diana Santos, 2008-09-26 The eighth campaign of the Cross Language Evaluation Forum CLEF for European languages was held from January to September 2007 There were seven distinct evaluation tracks in CLEF 2007 designed to test the performance of a wide range of multilingual information access systems or system components CLEF is by now an established international evaluation initiative and in 2007 81 groups from all over the world submitted results for one or more of the different evaluation tracks Full details regarding the design of the tracks the methodologies used for evaluation and the results obtained by the participants can be found in the different sections of these proceedings As always the results of the campaign were reported and discussed at the annual workshop held in Budapest Hungary 19-21 September immediately following the eleventh European Conference on Digital Libraries The workshop plays an important role by providing the opportunity for all the groups that have participated in the evaluation campaign to get together to compare approaches and exchange ideas

Multimedia Information Retrieval Stefan Rueger, 2009-12-08 At its very core multimedia information retrieval means the process of searching for and finding multimedia documents the corresponding research field is concerned with building the best possible multimedia search engines The intriguing bit here is that the query itself can be a multimedia excerpt For example when you walk around in an unknown place and stumble across an interesting landmark would it not be great if you could just take a picture with your mobile phone and send it to a service that finds a similar picture in a database and tells you more about the building and about its significance for that

matter This book goes further by examining the full matrix of a variety of query modes versus document types How do you retrieve a music piece by humming What if you want to find news video clips on forest fires using a still image The text discusses underlying techniques and common approaches to facilitate multimedia search engines from metadata driven retrieval via piggy back text retrieval where automated processes create text surrogates for multimedia automated image annotation and content based retrieval The latter is studied in great depth looking at features and distances and how to effectively combine them for efficient retrieval to a point where the readers have the ingredients and recipe in their hands for building their own multimedia search engines Supporting users in their resource discovery mission when hunting for multimedia material is not a technological indexing problem alone We look at interactive ways of engaging with repositories through browsing and relevance feedback roping in geographical context and providing visual summaries for videos The book concludes with an overview of state of the art research projects in the area of multimedia information retrieval which gives an indication of the research and development trends and thereby a glimpse of the future world Table of Contents What is Multimedia Information Retrieval Basic Multimedia Search Technologies Content based Retrieval in Depth Added Services Multimedia Information Retrieval Research Summary **Semantic Paths in Business Filings Analysis** Seán
