Cryptography And Network Security Atul Kahate:

Cryptography and Network Security Atul Kahate, 2013 **Industry 4.0 Technologies for Education** P. Kaliraj, T. Devi, 2022-12-27

The transformative digital technologies developed for Industry 4.0 are proving to be disruptive change drivers in higher education. Industry 4.0 technologies are forming the basis of Education 4.0. Industry 4.0 Technologies for Education: Transformative Technologies and Applications examines state-of-the-art tools and technologies that comprise Education 4.0. Higher education professionals can turn to this book to guide curriculum development aimed at helping produce the workforce for Industry 4.0. The book discusses the tools and technologies required to make Education 4.0 a reality. It covers online content creation, learning management systems, and tools for teaching, learning, and evaluating. Also covered are disciplines that are being transformed by Industry 4.0 and form the core of Education 4.0 curricula. These disciplines include social work, finance, medicine, and healthcare. Mobile technologies are critical components of Industry 4.0 as well as Education 4.0. The book looks at the roles of the Internet of Things (IoT), 5G, and cloud applications in creating the Education 4.0 environment. Highlights of the book include: Technological innovations for virtual classrooms to empower students; Emerging technological advancements for educational institutions; Online content creation tools; Moodle as a teaching, learning, and evaluation tool; Gamification in higher education; A design thinking approach to developing curriculum in Education 4.0; Industry 4.0 for Service 4.0 and Research 4.0 as a framework for higher education institutions; Eye tracking technology for Education 4.0; The challenges and issues of the Internet of Things (IoT) in teaching and learning.

Identity Management for Internet of Things Parikshit N. Mahalle, Poonam N. Railkar, 2022-09-01

The Internet of Things is a wide-reaching network of devices, and these devices can intercommunicate and collaborate with each other to produce a variety of services at any time, any place, and in any way. Maintaining access control, authentication, and managing the identity of devices while they interact with other devices, services, and people is an important challenge for identity management. The identity management presents significant challenges in the current Internet communication. These challenges are exacerbated in the Internet of Things by the unbound number of devices and expected limitations in constrained resources. Current identity management solutions are mainly concerned with identities that are used by end users and services to identify themselves in the networked world. However, these identity management solutions are designed by considering that significant resources are available, and applicability of these identity management solutions to the resource-constrained Internet of Things needs a thorough analysis. Technical topics discussed in the book include: Internet of Things Identity Management; Identity models in Internet of Things; Identity management and trust in the Internet of Things context; Authentication and access control; Identity management for Internet of Things contributes to the area of identity management for ubiquitous devices in the Internet of Things. It initially presents the motivational factors together with the identity management problems in the context of Internet of Things and proposes an identity management framework. Following this, it refers to the major

challenges for Identitymanagement and presents different identity management models This book also presents relationship between identity and trust different approaches for trust management authentication and access control ECCWS 2021 20th European Conference on Cyber Warfare and Security Dr Thaddeus Eze,2021-06-24 Conferences Proceedings of 20th European Conference on Cyber Warfare and Security Secure Data Management for Online Learning Applications L.
