Culture and the Human Body John W. Burton, 2001 To appreciate the human body is to acknowledge the various ways in which it has become a cultural artifact rather than a purely natural phenomenon **BOOK JACKET** **Body as Medium of Meaning**, 2004 Bodies move and they express There is a body language and there is a language employed to refer to the body its parts and the states of its being Consciously and unconsciously people judge each other according to body and clothing behavior What one thinks one expresses is not necessarily how one is seen and judged and the variety of observations made of the body is diverse Bodily behavior and interpretations of this behavior face change at frontiers of culture areas or when cultures meet each other as a result of migration This book addresses and expands upon these issues Soheila Shahshahani teaches at the Shahid Beheshti University Teheran Iran **Perceiving the Divine through the**

McDaniel, 2011-11-07 Cattoi and McDaniel present a selection of articles on the role of the body and the spiritual senses our transfigured channels of sensory perceptions in the context of spiritual practice The volume investigates this theme across a variety of different religious traditions within Christianity Hinduism Buddhism and Daoism

Public Theology and the Importance of Visual Culture Toine van den Hoogen, 2024-04-23 This book asserts the importance of conducting research on visual culture phenomena in public theology As we increasingly communicate and express our social and cultural identities through images in today's culture and economy visual culture has become a burgeoning area of study and research in many academic institutions In light of this public theology must engage with this complex field The concept of iconicity is raising fresh inquiries within the realm of public theology which is already rife with hermeneutic concerns These questions must be revisited as images compel us to reassess our ongoing approach to the interpretation of religion The potency of images is an uncharted and potent force propelling public theology towards a future that is yet to be discovered **World Meetings**, 2002 **Choice**, 2002-05 **Biotechnology and Culture** Paul E.

Brodwin, 2001-01-22 Essays on technology's effect on our relationship with our bodies A timely and perceptive look at some of the most anxiety producing issues of the day Paul Rabinow University of California Berkeley As birth illness and death increasingly come under technological control struggles arise over who should control the body and define its limits and capacities Biotechnologies turn the traditional facts of life into matters of expert judgment and partisan debate They blur the boundary separating people from machines male from female and nature from culture In these diverse ways they destroy the gold standard of the body formerly taken for granted Biotechnologies become a convenient tangible focus for political contests over the nuclear family legal and professional authority and relations between the sexes Medical interventions also transform intimate personal experience giving birth building new families and surviving serious illness now immerse us in a web of machines expert authority and electronic images We use and imagine the body in radically different ways and from these emerge new collective discourses of morality and personal identity This book brings together historians anthropologists

cultural critics and feminists to examine the broad cultural effects of technologies such as surrogacy tissue culture research and medical imaging The moral anxieties raised by biotechnologies and their circulation across class and national boundaries provide other interdisciplinary themes for discourse in these essays The authors favor complex social dramas of the refusal celebration or ambivalent acceptance of new medical procedures Eschewing polemics or pure theory contributors show how biotechnology collides with everyday life and reshapes the political and personal meanings of the body Contributors include Paul Brodwin Lisa Cartwright Thomas Csordas Gillian Goslinga Roy Deborah Grayson Donald Joralemon Hannah Landecker Thomas Laqueur Robert Nelson Susan Squier Janelle Taylor and Alice Wexler This impressive collection offers a number of rich examples of why the development of anthropological studies of science technology and their disruptive social effects is a leading edge of critical enquiry Arthur Kleinman Harvard University **Annual Review of Anthropology** ,1993 Annual compilation of critical articles from all areas of the discipline of anthropology **Annual Review of Anthropology** William H.
