How To Use Ai Slideshow Maker For Beginners For Students:

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

Artificial Intelligence Literacy in Higher Education Imre Fekete, 2025-07-08 This book explores the concept of artificial intelligence (AI) literacy within higher education, addressing both instructors and students' preparedness to engage with AI technologies responsibly and effectively. By synthesizing existing frameworks and empirical studies alongside presenting two original research studies, the book bridges theoretical foundations with practical applications tailored for modern educational contexts. Practical recommendations include methods to develop AI literacy skills, focusing on ethical awareness, technological competence, and the potential for AI to enhance teaching and learning processes. Aimed at higher education instructors, stakeholders, and students, the book offers actionable insights and tools for fostering informed and critical engagement with AI aligned with lifelong learning goals and professional development needs.
