Father, Sons, and Holy Mother Gavin Jones,2025-04-26 Father Sons and Holy Mother is a deeply introspective coming of age novel that follows Dean a sensitive artistic teen quietly exploring the intricate layers of identity masculinity and belonging Navigating adolescence in a household bound by tradition and expectation Dean finds himself at a crossroads between staying true to who he is and not wanting to disrupt the fragile fabric of family dynamics At the heart of the story is a compelling portrait of fatherhood imperfect sometimes harsh but laced with a quiet love that reveals itself in unexpected moments As Dean silently battles internal questions about who he is and who he s expected to be his father often misunderstood becomes a complex figure of both confrontation and comfort Set against the backdrop of brotherhood cultural expectations and the longing for acceptance Father Sons and Holy Mother is a stirring exploration of youth identity and the hope that love even when unspoken can be enough to hold a family together   Federated Learning Mei Kobayashi,2025-08-01 This book serves as a primer on a secure computing framework known as federated learning Federated learning is the study of methods to enable multiple parties to collaboratively train machine learning AI models while each party retains its own raw data on premise never sharing it with others This book is designed to be accessible to anyone with a background in undergraduate applied mathematics It covers the basics of topics from computer science that are needed to understand examples of simple federated computing frameworks It is my hope that by learning basic concepts and technical jargon from computer science readers will be able to start collaborative work with researchers interested in secure computing Chap 1 provides the background and motivation for data security and federated learning and the simplest type of neural network Chap 2 introduces the idea of multiparty computation MPC and why enhancements are needed to provide security and privacy Chap 3 discusses edge computing a distributed computing model in which data processing takes

place on local devices closer to where it is being generated Advances in hardware and economies of scale have made it possible for edge computing devices to be embedded in everyday consumer products to process large volumes of data quickly and produce results in near real time Chap 4 covers the basics of federated learning Federated learning is a framework that enables multiple parties to collaboratively train AI models while each party retains control of its own raw data never sharing it with others Chap 5 discusses two attacks that target weaknesses of federated learning systems 1 data leakage i e inferring raw data used to train an AI model by unauthorized parties and 2 data poisoning i e a cyberattack that compromises data used to train an AI model to manipulate its output **AI in Language Teaching, Learning, and Assessment** Pan, Fang,2024-02-12 The introduction of Artificial Intelligence AI has ignited a fervent academic discourse AI s role is as both a powerful ally and a potential adversary in education For instance ChatGPT is a generative AI which mimics human conversation with impressive precision Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding Yet as with any innovation its advent has sparked a spirited academic dialogue AI in Language Teaching Learning and Assessment seeks to address these concerns with rigor and thoughtfulness It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings This book lays out the multifaceted benefits of incorporating AI into language teaching learning and assessment Its chapters dissect the transformative impact of AI on pedagogy teaching materials assessment methodologies applied linguistics and the broader landscape of language education development This book is a valuable resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education **The New Fire** Ben Buchanan,Andrew Imbrie,2022-03-08 AI is revolutionizing the world Here s how democracies can come out on top Artificial intelligence is revolutionizing the modern world It is ubiquitous in our homes and offices in the present and most certainly in the future Today we encounter AI as our distant ancestors once encountered fire If we manage AI well it will become a force for good lighting the way to many transformative inventions If we deploy it thoughtlessly it will advance beyond our control If we wield it for destruction it will fan the flames of a new kind of war one that holds democracy in the balance As AI policy experts Ben Buchanan and Andrew Imbrie show in The New Fire few choices are more urgent or more fascinating than how we harness this technology and for what purpose The new fire has three sparks data algorithms and computing power These components fuel viral disinformation campaigns new hacking tools and military weapons that once seemed like science fiction To autocrats AI offers the prospect of centralized control at home and asymmetric advantages in combat It is easy to assume that democracies bound by ethical constraints and disjointed in their approach will be unable to keep up But such a dystopia is hardly preordained Combining an incisive understanding of technology with shrewd geopolitical analysis

Buchanan and Imbrie show how AI can work for democracy With the right approach technology need not favor tyranny
