The International Responsibility of States for AI-enabled Space Activities Stefan-Michael Wedenig,2025-12-22

Artificial Intelligence AI has permeated our every day lives What once was solely a human task has now been taken over by AI May it be credit card approvals customer support financial transactions medical imaging or software development there is AI working behind the scenes Outer space historically always amongst the most developed domains has not remained untouched for long and space applications have started to increasingly rely on AI However this increase in use also leads to a myriad of legal issues particularly the issue of responsibility and liability under Article VI and Article VII of the Outer Space Treaty and the Liability Convention Our legal norms may they be domestic or international in nature are ultimately built around human behaviour and when applied to AI might not function Should damage caused by an AI enabled space object arise it proves difficult to assess the responsibility of the appropriate State party under Article VI of the Outer Space Treaty or the liability of the launching State While legal literature is primarily concerned with domestic legal issues arising from the use of AI an in depth analysis concerning State responsibility and liability for AI enabled space activities is absent Space legal literature strongly favours a view advocating for the creation of new hard law in form of new binding legal instruments or the amendment of existing law Suggestions de lege ferenda are often relied on by authors Given the inherent difficulty in creating new law or amend existing legal instruments this book proposes to look towards the lex lata and argues that the existing legal norms of State responsibility State liability and treaty law are sufficient to govern the responsibility of States for their AI enabled space activities The present research looks at these issues from a public international law perspective and proposes a solution within the lex lata

Hammouda, 2025-09-21 *Artificial Intelligence Is Here to Stay, You Better Learn It Now!* Patience Fuzane, Artificial Intelligence AI is no longer just a futuristic concept; it is here, and it is transforming the way we live, work, and interact. If you are not actively harnessing the power of AI, you risk being left behind in an increasingly competitive and fast-paced world. Just like the calculator revolutionized the way we perform basic arithmetic, AI is now stepping in to revolutionize a wide array of fields: academic, business, and social. When the calculator was first introduced, many feared it would take away jobs and diminish mental faculties. But over time, we have come to view it as an indispensable tool, one that saves us time and allows us to focus on more complex tasks. In much the same way, AI is poised to become an essential part of our daily lives, yet its potential goes far beyond what a calculator ever offered. From automating mundane tasks to solving complex problems, AI has the power to revolutionize virtually every aspect of our existence. As we move forward, it is crucial to embrace these technological advancements and learn how to effectively incorporate them into our routines. This book is a comprehensive guide to understanding and utilizing some of the most widely used AI tools available today. Across the following chapters, I will take you on a deep dive into AI solutions across various categories, including generative AI, productivity tools, coding assistants, design tools, data analysis, and more. Whether you're a student, a business owner, or simply someone curious about how AI can improve your life, this book is designed to help you navigate and leverage these powerful technologies to meet your academic, professional, and social needs. **Social Media Strategy** Keith A.
