**The Power of Ideas** Zhiyi Liu,2022-12-08 As the first academic monograph that a Chinese scholar discusses the histories of thoughts and ideas related to the development of digital economics this book aims to make research from the perspective of the history of ideas and discuss the ideas influencing the development of digital economics and the evolution of related theories and thoughts with the methodology of interdisciplinary research The human society is in the stage of major historic transition and enters the digital world with the main goal of developing the artificial world In this world the development of digital economics is significantly characterized by the deep interaction between the real and the virtual worlds while the key triggering this paradigm reform is the evolution of ideas since the modern times While involving the field of computer these thoughts are also related to the fields of philosophy ethics communication and economics Therefore the results of the research on the history of ideas related to digital economics are required to really understand the depth of this discipline If

computationalism is the most important paradigm evolution of natural science the most important paradigm evolution of social science is interdisciplinary complex science In the meantime this book is the most significant in understanding the nature of paradigm evolution related to the development of digital economics from the perspective of complex science and interdisciplinary systematic researches Digital economics is in the foundation laying phase while this book mainly aims to historically narrate the thoughts of this discipline and hopes that readers can understand the influence of ideas in the old era on shaping the disciplines in the new era while exploring this new discipline The construction of digital economics is a process of evolution This book will be helpful to understand the underlying logic of the ideas constructed by the thinkers in different fields     Automation ,1990     **The Human Hippocampus** Mehmet Turgut,Niyazi Acer,Ahmet T. Turgut,Concezio Di Rocco,2025-06-18 Written and edited by leading international authorities in the field this book provides an in depth review of knowledge of human hippocampus and role of the hippocampus in memory cognition and learning It includes informative chapters organized into two main groups 1 fundamental information about the human hippocampus including history development neuroanatomy neurophysiology neuropathology structural and synaptic plasticity volume 3D visualition of the human hippocampus and etc and 2 role of the hippocampus in memory cognition and learning including role of the hippocampus in cognition time and memory learning and etc There are some unique features about this book cross references within chapters to highlight connections between development anatomy physiology pathology and surgery real world examples to illustrate key points and practical applications summaries of the latest research to keep readers informed of cutting edge developments Thus this comprehensive reference book will be an ideal source for neuroscientists at all levels from graduate students to researchers in specific disciplines studying this region including neurosurgeons neurologists neuroradiologists neuroanatomists and psychiatrists who seek both basic and more advanced information regarding the human hippocampus     Robotic Technology, Artificial Intelligence and the 4IR Libraries Adeyinka Tella,Omwoyo Bosire Onyancha,2025-10-14 This book addresses the challenges associated with information provided in the 4th Industrial Revolution 4IR and the attendant opportunities that arise for libraries and other information services Robotic technology and artificial intelligence are key developments in the information age with tremendous impact on the way information is processed and used by both information professionals and users including information service providers such as librarians Information professionals practitioners and users will find this book useful in their endeavor to use the emerging technologies to improve their operation and find and access specific information easily It describes what needs to be done by librarians to stay relevant and functional in the wake of change and addresses the necessary new skills needed by information professionals to be able to deliver effective services in the 4IR     **Intelligent Retail** Gerrit Heinemann,2022-10-13 This book shows stationary retail a way to reinvent itself after Corona in order to be able to survive against the strong competition of online retail The focus is on the central issues that will shape the retail of the future For

example brick and mortar retail in particular must now work with intelligent systems based on data and adopt or even surpass methods that the large online marketplaces have been using successfully for a very long time In this regard artificial intelligence also plays a major role in retail This is not just about automation and robots taking over tasks but also about instruments and machines being able to learn and draw conclusions themselves in all retail functions This is becoming increasingly difficult because our shopping and search behavior is constantly changing Therefore a customer should receive intelligent recommendations in the store which are also based on his already known interests and behavior patterns Gerrit Heinemann shows how intelligent action can save stationary retail in city centres and shopping centres The content From stationary Retail to intelligent Retail Threats to the stationary retail trade Basic requirements and manifestations of intelligent Retail Examples of intelligent retail of the future Risks for intelligent Retail
